BACH-FLOWER-THERAPY FOR PETS

As a novelty, Canina® offers Bach flower mixtures for the most frequent health problems of pets. These mixtures can be given by the pet owner, depending on the respective needs of the animal. The products are available as alcohol-free globules and can be kept longer than individually prepared watery solutions. A combination of different mixtures is possible.

Mixture no. 1 Emergency Drops

In case of accident, shock, serious pain, surgery. Give as often as needed until the animal calms down. If the animal is unconscious, place globules in the corners of the flews.

Composition: Star of Bethlehem, Rock Rose, Impatience, Cherry Plum, Clematis

Mixture no. 2 Anxiety

When scared of people, objects, approaching hands, other dogs or for dogs that are just generally nervous.

Composition: Aspen, Cherry Plum, Rock Rose, Mimulus

Mixture no. 3 Aggression

When showing aggressive behaviour such as destructive frenzies, biting or constantly crying.

Composition: Holly. Beech, Impatiens, Vine

Mixture no. 4 Assisting in Learning

If an animal has learning problems, difficulties in understanding while playing, doing sports or living together with human beings.

Composition: Wild Oat, Chestnut Bud, Centaury, Hornbeam

Mixture no. 5 Exhaustion, Recovery

After surgery, during the recovery period and also for generally weak animals.

Composition: Olive, Oak, Elm, Gorse

Mixture no. 6 Loss, Mourning

Help when a person to whom the animal is closely related to or an animal partner has passed away in order to cope with the sorrow

Composition: Larch, Honeysuckle, Mustard

Mixture no. 7 Purge, Detoxication

A cure to maintain vitality and regeneration, for all animals, both ill and healthy.

Composition: Crab Apple, Chicory, Clematis, Elm

Available Size:

10g = 1.200 globules. The globules are given in the feed or dissolved in the drinking water.

Dosage:

Acute problems: 2 – 3 times daily for one week

Chronic problems: 1 – 2 times daily for about one month

Birds: Depending on the size 2 – 5 globules

Pets: Depending on the size and weight 5 – 10 globules

BIOCHEMICAL REMEDIES FOR PETS ACCORDING TO DR. SCHUESSLER

Dr. Wilhelm Heinrich Schuessler and his life's work

W.H. Schuessler was born in the district of Oldenburg in 1821. His major interest was always homoeopathy. Yet he was searching for a manageable way of healing. During 15 years he developed his biochemistry consisting of 12 mineral substances of which he said "that all illnesses, if at all curable, can be cured. From 1872 on he solely used these substances in his consulting rooms with great success.

12 Schuessler salts for pets

Petvital biochemical medication according to Dr. Schuessler is offered in the form of solution for comfortable, frequent and safe administering to all domestic animals. The liquid dilutions in 50 ml bottles are sufficient for 200 to 400 dispensations. They are best administered in water. The absorption of Dr. Schuessler's products into the animal's organs works through oral mucosa, as it does with any other homeopathic remedy. Side effects, interaction with other remedies or effects of addiction are not known.

Dosage:

Small pets: three times daily 3 – 4 drops

Large pets: three times daily 5 – 10 drops

If different Schuessler Salts are given at the same time, the daily total dosage of the above mentioned dosage should not be exceeded.

Duration of application:

- Acute problems: until symptoms ease off
- Sub-acute problems (it is existing for one week already): continue to apply for about one week after symptoms have disappeared
- Chronic problems: for several weeks or even months

The excipient contains 15 % alcohol, which is given in very small amounts and can be decomposed very fast by the organism. If an animal is very sensitive for aromas the Schuessler solution can be given into the drinking water 20 minutes before administering it to the pet.

Calcium fluorite D₁₂

Elasticity and solidity of bones and tissue

Can be well applied together with No 2 Calcium phosphate

State of mind

Fearful, restless, depressive, irritable (older animals), stiff, undecided, no self-confidence, continuously looking for the person of reference, fear of solitude

Constitution

Slim up to undernourished animals, weak, weakness of joints, sinews and ligaments, often deflated belly

Art. No. 714704

Calcium phosphate D₆

Building of bone substance and growth support

Application recommended together with No 1 Calcium fluorite

State of mind

Nervous, tense animals, jumpy to the extend of panic, easily tiring, forgetful, don't like to be held, yet will keep in constant contact to the person of reference; distrustful, fearful, frightened to be left alone

Constitution

Fast grown animals, tender jointed, delicately skinned, weak, sometimes overweight with heavy head

Art. No. 714711

Iron phosphate D12

Stimulation of blood circulation, fever, at the beginning of illness

State of mind

Nervous, oversensitive, restless, seeking attention, aggressive resulting from very intensive excitement (can hardly be controlled and does no longer recognise anybody), then again frightful, exhausted and tired

Constitution

Oversensitive, weakening, anaemic and exhausted animals, easily excitable, contracts infectious illnesses easily
Art. No. 714728

Potassium chloride D6

Inflammation with discharge, thick slime, gland medication

State of mind

Laziness to the extent of stupidity, but very irritable, minor events lead to aggression, followed by passive behaviour, whining, dissatisfaction, distrust and lack of concentration

Constitution

Rather overweight, always hungry type swollen belly and sensitive to touch
Art. No. 714735

Potassium phosphate D6

Treatment on recovery and antiseptic

State of mind

Lack of energy, exhaustion, nervousness, melancholic - depressive, frightful, jumpy, on edge, no self-confidence, whining, the animal withdraws itself

Constitution

Slim to the extent of emaciated animals, apathic, exhausted, discouraged; puppies and older animals physically or mentally retarded, sensitive to cold temperatures
Art. No. 714742

Potassium sulphate D6

Detoxication and purification, chronic illness

State of mind

Restless, watchful, does what other animals do, irritable, annoyed, fear of being neglected; bites because of fear!

Constitution

Oversensitive, overweight, always hungry animals, always wanting to go outside, coat gets pre-maturely grey
Art. No. 714759

Magnesium phosphate D6

Convulsive pain, colic, heart and nerves

State of mind

Depressive, fearful, nervous, hysteric behaviour, hyperventilated, insecure, often changing moods, startled awakening at night

Constitution

Oversensitive, responsive to pain, often lean animals with slack belly, timid against touch, weak memory of older animals
Magnesium phosphate D6
Convulsive pain, colic, heart and nerves
Art. No. 714766

Sodium chloride D6

Regulation of liquid balance in the body

State of mind

Whining, melancholic, depressive, attacks of panic, claustrophobia, sad, apathetic, timid, tiring and fast withdraws itself, can hardly be motivated, unforgiving, gets fits of rage after comforting or consolation, does not like the company of other dogs, briskly changing moods, does not like changes

Constitution

Trembling all over, remarkable weakness, losing weight despite insatiable hunger, slack belly, swollen glands, responsive against noise
Art. No. 714773

Sodium phosphate D6

Regulation of acidities in the body

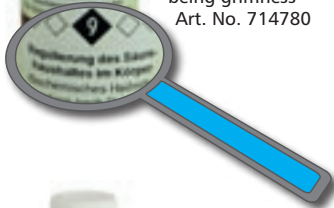

State of mind

Hyper nervous, constantly tired, exhausted, depressive, in bad mood (easily insulted), sad, frightful at night

Constitution

Often overweight animals which are constantly hungry, external signs of being grimness

Art. No. 714780

Sodium sulphate D6

Reduction of residues and water, liver and gall treatment

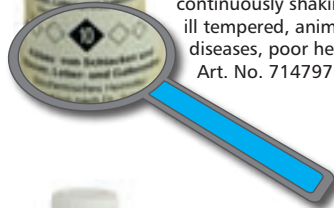

State of mind

Bad mood, unapproachable, proud, melancholic, irritable, impulsive up to aggressive, angry, furious, sad thereafter

Constitution

Weak animals, sensitive to cold, continuously shaking, cold paws, ill tempered, animals with liver diseases, poor healing of injuries

Art. No. 714797

Silicea D12

Coat, claws, skin, with purulent inflammation

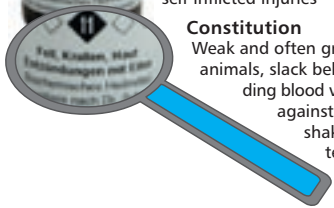

State of mind

Extremely sensitive to weather conditions and external influences, can well be left by itself, choosy with food, acts as if having done something wrong, stubborn, briskly nervous, does not tolerate rebuke or contradiction, irritable, very susceptible towards stress, tendency to self inflicted injuries

Constitution

Weak and often growth retarded animals, slack belly, intense protruding blood vessels, sensitive against light and noise, shaking at the slightest drought

Art. No. 714803

Calcium sulphate D6

Treatment of skin and mucous membrane, open festering

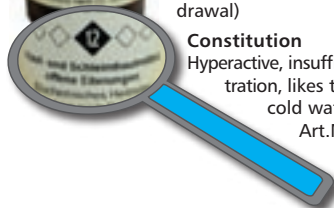

State of mind

Always in a hurry, longing for attention, feels neglected easily, acts destructive, is filthy, self-mutilation, when left alone strong fixation towards favoured person, restless sleep, nightmares, is like paralysed after an experience of shock (with-drawal)

Constitution

Hyperactive, insufficient concentration, likes to bath, even in cold water

Art.No. 714810

Petvital® Insect Protect

- Biological remedy for pets
- As protection against insect and tick bites
- As abatement after insect and tick bites

Dosage:

2-5 globules per administration in the feed or dissolved in the drinking water

After insect bites depending on the course: 2-3 times daily until the symptoms disappear

As protection: 1 – 2 times daily during the season

Available sizes:

Art. No. 714650 – 10 g (ca. 1.200 globules)

Biotin Forte Powder & Tablets

- To be applied at itchiness, hair loss, dull coat, dandruff, pigmentary problems and eczemas
- Tablets: especially for long-haired dogs
Powder: especially for short-haired dogs
- Carrier substance: mineral-yeast in food quality

Composition:

Beer- and mineral-yeast

Additives per kg:

Powder: biotin 400.000 mcg

Tablets: biotin 1.500.000 mcg (= 5 mg per tablet)

Feeding recommendation per dog and day:

Powder: Dogs up to 10 kg body weight 1 tablespoons

Medium breeds up to 20 kg 1½ tablespoons

Large breeds above 20 kg 2 tablespoons

Tablets Dogs up to 5 kg body weight ½ tablet

Dogs of approx. 10 kg 1 tablet

Dogs of 20 kg and above 2 tablets

Available sizes:

Powder: Art. No. 101009 - 200 g

Art. No. 101006 - 500 g

Art. No. 101023 - 2.000 g

Tabletten: Art. No. 101092 - 100 g (approx. 30 Tablets)

Art. No. 101108 - 200 g (approx. 60 Tablets)

Art. No. 101115 - 700 g (approx. 210 Tablets)

Art. No. 101122 - 2.000 g (approx. 600 Tablets)

content of biotin per kg
Powder: 400 mg
Tablets: 1.500 mg

PETVITAL® Biotin Tabs

- Very high taste acceptance
- Especially for spoiled animals

Composition:

Dextrose, rice semoline, cacao, flavouring

Additives per kg:

Biotin 1.000.000 mcg; vitamin B₂ 350 mg;

nicotinic acid 1.750 mg; cholinchloride 8,06 g

Feeding recommendations:

per 10 kg body weight 1 tablet a day with 2 mg biotin

Available sizes

Art. No. 702008 - 100 g = approx. 50 tablets

Art. No. 702015 - 1.000 g = approx. 500 tablets

content of biotin per kg
1.000 mg

Coat O.K. Powder & Tablets

- To prevent biotin deficiency symptoms
- Meets daily requirements
- In severe cases and during moulting we recommend Canina's Biotin Forte

Composition:

Powder: Rice semolina, calcium carbonate

Tablets: Dextrose, starch, rice semolina

Additives per kg:

Biotin 100.000 mcg

Feeding recommendation per dog and day:

Powder: per 10 kg body weight 1 full teaspoon
(1 teaspoon = ca. 5 g with 0,5 mg biotin)

Tablets: per 10 kg body weight 1 tablet with 1 mg biotin

Available size:

Powder: Art. No. 101207 - 200 g

Art. No. 101214 - 500 g

Art. No. 101221 - 2.000 g

Tablets: Art. No. 101306 - 250 g (approx. 125 tablets)

Art. No. 101313 - 1.000 g (approx. 500 tablets)

Art. No. 101320 - 2.000 g (approx. 1000 tablets)

Dog Coat Gel

- Biotin-zinc product with 333,000 mcg biotin and 500 mg zinc per kg
- High taste acceptance even with spoiled dogs
- Typical clinical symptoms of biotin insufficiency are described as follows: The hair gets dry and brittle, it loses its shine and breaks easily and finally falls out, the skin flakes, the skin and hair bleaches and dermatitis will develop with crusting and scabs. The animals show increased itching.

Composition:

Dextrose, raw sugar cane

Additives per 1,000 ml:

Biotin 333,000 mcg, zinc 500 mg, conserved with potassium sorbate and citric acid

Feeding recommendations per dog per day:

Over a period of 6 weeks 1 teaspoon per 5 kg body weight spread over the feed or directly into the mouth. After that, half the amount will be sufficient in general. (1 teaspoon = approx. 1,5 mg biotin)

Available size:

Art. No. 130900 - 100 ml

PETVITAL® Derm-Caps & Derm Liquid

- For metabolic, hormone and allergy-related skin and hair problems
- With evening primrose oil as a particularly active essential fatty acid
- In the following conditions, an insufficiency of fatty acids may occur: During growth and lactation, in old age under stress (e.g. in the heat season or pregnancy), diabetes, cortisone treatment, after surgery etc.
- An insufficiency is also shown by brittle and dry hair, eczema (especially between the toes), dandruff, skin allergy, increased proneness to skin irritation with infections, inflammation of the auditory meatus, increased ear wax formation, delayed wound healing, growth anomalies.

Composition:

Evening primrose oil, sea animal oil

Additives per 1.000 ml Derm-Caps:

Zinc 1.025 mg / 0,3 mg per capsule; vitamin A 957.101 IU/ 280 IU per capsule; pantothen acid 6.836 mg / 2.0 mg per capsule; biotin 34.182 mcg / 10,0 mcg per capsule

Additives per 1.000 ml Derm Liquid:

Vitamin E (as alpha-tocopherol acetate) 141.288 mg, dexpanthenol 463 mg, biotin 139 mcg

Feeding recommendation per dog and day:

Derm-Caps: over a period of about 2 weeks, 1 capsule a day per 10 kg body weight. After this cure an administration of 1 capsule per 10 kg body weight 3 times a week is sufficient.

Derm Liquid: 8 drops a day per 10 kg body weight spread over the feed.

Feed at least for 4 weeks in case of deficit symptoms.

Available size:

Derm-Caps: Art. No. 702107 40g (ca. 100 capsules)

Derm Liquid: Art. No. 702206 - 25 ml / Art.No. 702213 - 250 ml

Seaweed Tablets

- Improve pigmentation of hair, eyes, nose, paws and gums
- With numerous trace elements, vitamins, carotinoids and minerals
- Made of fresh seaweed (ascophyllum)
- Rich in aminoacids

Feeding recommendation per animal and day

	Up to 10 kg	Up to 20 kg	20 kg and above
Instruction in tablets	3	5	10
Instruction in teaspoons	1	2	3-5

Double the amount should be given to pregnant and lactating animals.

Available Sizes:

Tablets: Art. No. 130504 - 225 g (approx. 225 Tabl.)

Art. No. 130511 - 750 g (approx. 750 Tabl.)

Art. No. 130528 - 2.250 g (approx. 2.250 Tabl.)

Powder: Art. No. 130405 - 250 g

Art. No. 130412 - 750 g

Art. No. 130429 - 4.000 g

Yeast Powder & Tablets

- Appetising and tasty supplement feed
- A purely natural product with beer and mineral yeast. It includes all important components: all B-vitamins, biotin, minerals and high-grade proteins
- B-vitamins act as catalyser in all tissues and are indispensable in the carbohydrate and protein metabolism and they support the cell division
- Improves the vitality and strengthens the nerves
- Protects skin and hair and strengthens the claws
- The high content of minerals and trace-elements like, calcium and zinc support the willingness to perform as the production of energy is activated on cell level
- Strengthens the immune-system
- Balances deficiencies of nutrient
- As support at increased energy demand (e.g. breeding puppies, physical or mental training)
- As an optimal supplement during and after illnesses

Feeding recommendation per dog and day				
	up to 15 kg	up to 30 kg	up to 40 kg	over 40 kg
Instruction in tablets	3-5	6-10	10-18	max. 20
Instruction in teaspoon	1	2	3	max. 4

Available size:

- Tablets: Art. No. 130009 - 250 g (approx. 310 tablets)
 Art. No. 130016 - 800 g (approx. 1.000 tablets)
 Art. No. 130023 - 2.500 g (approx. 3.100 tablets)
- Powder: Art. No. 130108 - 600 g
 Art. No. 130115 - 3.000 g

Canhydrox GAG

To strengthen the connective tissues, joints, cartilages, bones, teeth, ligaments and tendons!

- With **hydroxyl apatite**: It provides elastic stability and solidity of the bones, activates the callus formation, supports the bone formation of straight and well axial aligned extremities, prevents osteoporosis and is essential for the bone formation
- **With silica**: Helps to strengthen the connective tissue, ligaments, tendons and claws
- **With vitamin C**: Strengthens the connective tissue and supports a strong anchorage of teeth

GENERAL:

- Strengthens ligaments, sinews and musculature
- Formation of a strong skeleton
- Prevents hip dysplasia
- Formation of a strong denture, firm gums, hardening of the dental enamel

FOR PUPPIES AND YOUNG DOGS WITH:

- Deformed extremities (knock-knees or bow-legs)
- Overextension
- Loose joints
- Loose connective-tissue

FOR FULLY GROWN DOGS:

- At degradation of joints (arthrosis)
- As support for performance as the elasticity of the bones is enhanced
- As prevention of osteoporosis, joints and motion problems in the age
- After surgery at bones and after fractures for callus formation

Ingredients:

hydroxyl apatite, yeast, green-lipped mussel extract, seaweed, magnesium oxide, silicon oxide

Additives per kg:

vitamin C 100.000 mg, vitamin E (as alpha-tocopherol acetate) 10.000 mg, selenium 12 mg

Feeding recommendation per dog and day:

Young dogs from the 4th month: preventive 2 tablets per 10 kg body weight up to the 15th month.

In case of deformed extremities: 4 tablets per 10 kg body weight at least for 4 months, then 2 tablets per 10 kg body weight will be sufficient.

Older dogs: 4 tablets per 10 kg body weight

Performance dogs:

2 tablets per 10 kg body weight – 2 weeks prior to and after the performance phase.

After bone fractures: 4 tablets per 10 kg body weight – during the healing process.

Available sizes:

Art. No. 123490 - 100 g (approx. 60 tablets)

Art. No. 123506 - 200 g (approx. 120 tablets)

Art. No. 123513 - 600 g (approx. 360 tablets)

Art. No. 123537 - 2.000 g (approx. 1.200 tablets)

indispensable for large breeds!

PETVITAL® GAG Powder & Tablets

- With shell extract of the green-lipped shell perna canaliculus, omega-3 fatty acids and aminoacids
- For soft tissue problems of joint capsules, tendons, ligaments and joints
- Also to be recommended for arthrosis, hip dysplasia (HD) and spondylosis
- For increased physical stress caused by training, contests, hunting, pregnancy, lactation
- Economical usage

Composition:

Shell extract (perna canaliculus), yeast, fish-meal, seaweed meal, calcium carbonate

Additives per kg:

Vitamin E (as alpha tocopherolacetate) 10.000 mg, Selenium 12 mg

Feeding recommendations per animal per day:

	Up to 15 kg	15 kg and above
Instruction in tablets	1	2-4
Instruction in teaspoon	1	2-4

Available sizes:

- Tabletten: Art. No. 723300 - 90 g (approx. 90 tablets)
 Art. No. 723317 - 180 g (approx. 180 tablets)
 Art. No. 723324 - 600g (approx. 600 tablets)
- Pulver: Art. No. 723201 - 100 g / Art. No. 723218 - 200 g
 Art. No. 723225 - 400 g / Art. No. 723232 - 1.000 g

PETVITAL® Arthro-Tablets

- To strengthen the joints. With vitamins, minerals and dried plants
- Positive influence on the bone-metabolism
- Weak joints are strengthened and become more stable
- Aging processes are slowed down
- Highly recommended for contusions, luxations, sprains, rheumatic pains, articular rheumatism and gout
- With Salix (willow bark) for pain relief

Composition: Plant produce, minerals, pre-mix

Additives per kg: Vitamin E 3.500 mg, Vitamin B₁ 1.200 mg, Iron 300 mg, Manganese 15 mg, Zinc 5 mg, Cobalt 4 mg, Molybdenum 2,5 mg, Copper 2 mg

Feeding recommendations:

From 6 weeks old, 1 tablet per 10 day per kg body weight for 30 days. (After a 6-month break, repeat the treatment.)

Older dogs: 3 x 1 tablet a day per 10 kg body weight for 30 days, repeat every 12 months.

After bone fractures, surgery and at growth abnormalities 2 x 1 tablet a day per 10 kg body weight for a period of 2 - 6 months.

Available sizes: Art. No. 723003 - 60 g (approx. 60 Tabl.) / Art.No. 723027 - 180 g (approx. 180 Tabl.)
 Art. No. 723010 - 1.000 g (approx. 1.000 Tabl.)

PETVITAL® Mineral Tabs

- To make up for calcium deficits
- For good bone growth
- To meet increased needs of calcium during pregnancy and lactation

Composition: calcium carbonate, manganese calcium phosphate, monocalcium, phosphate, calcium-sodium- phosphate, yeast, cacao, starch flour, sodium chloride

Additives: vitamin D₃ 10.000 IU.

Feeding recommendations per animal per day:			
Angaben in Tabletten	up to 10 kg	up to 20 kg	20 kg and above
Dry food	1	2	5
Wet food	2	3	7
self-made foodr	3	4	10

Ab dem 30. Trächtigkeitstag sollte die Dosierung verdoppelt werden

Available sizes:

Art. No. 723102 - 100 g (approx. 50 Tabl.) / Art.No. 723119 - 1.000 (approx. 500 Tabl.)

Caniletten & Canipulver – “the allrounder”

- To compensate for feed-related nutritional deficits.
- Feed lime with minerals, trace elements, vitamins, yeast and seaweed meal
- Essential for bone growth, teeth and muscles. Supports the metabolism, appetite, digestion and pigmentation
- Is fully absorbed by the body only after a few hours
- Calcium-phosphor relation 2 : 1

Composition:

Calcium carbonate, calcium-sodium-magnesium phosphate, monocalcium-phosphate, rice, semolina, yeast, seaweed meal, sodium chloride

Percentage of ingredients:

Calcium 18 %, phosphor 9 %, sodium 3.5 %

Percentage of additives per kg:

Vitamin A 470,000 IU, vitamin D3 10,000 IU, vitamin E 280 mg, vitamin B₁ 85 mg, vitamin B₂, vitamin B₆ 85 mg, vitamin B₁₂ 980 mcg, nicotine acid 630 mg, calcium-pantothenate 630 mg, folic acid 14 mg, iron 1.225 mg, copper 120 mg, manganese 260 mg, zinc 525 mg, iodine 4 mg, selenium 6 mg, Cobalt 1,5 mg

Feeding recommendations per animal per day:

Instruction in tablets	Instruction in teaspoon (powder)					
	Dogs weight	Up to 10 kg	Up to 20 kg	20 kg and above	Up to 10 kg	Up to 20 kg

Wet feed	½	1	1½
self-made feed	1	1½	2

Starting with the 30th day of pregnancy the dosage should be doubled

For lactating mother dogs: 4 puppies = dosage x 2,

4-6 puppies = dosage x 4, > 6 puppies = dosage x 5

Available sizes:

Tabletten: Art. No. 120109 - 350 g (ca. 350 Tabl.)

Art. No. 120116 - 1.000 g (ca. 1.000 Tabl.)

Art. No. 120123 - 6.250 g (ca. 6.250 Tabl.)

Pulver: Art. No. 120031 - 400 g

Art. No. 120000 - 1.000 g

Art. No. 120017 - 3.500 g

Calcina Calcium Citrate

- With 21% calcium, without phosphor
- Excellent compatibility
- For quick calcium supply, especially for aging and convalescing dogs as well as for smaller breeds
- For optimal supply of the teeth, skeleton and bones and keeping the muscles in good condition, it also helps to prevent osteoporosis
- In addition, the body needs calcium for blood clotting and better functioning of the heart
- To keep the muscles and nerve impulses functioning
- To activate enzyme systems

Ingredients:

21 % calcium

Feeding recommendations per animal per day:

Powder:			
Instruction in teaspoon	Up to 10 kg	Up to 10 kg	20 kg and above
Dry feed	½	1	1½
Wet feed	1	1½	2
self-made feed	1½	2	3

Starting with the 30th day of pregnancy the dosage should be doubled

For lactating mother dogs:

4 puppies = dosage x 2,

4-6 puppies = dosage x 4,

> 6 puppies = dosage x 5

Available sizes:

Art. No. 120505 - 125 g

Art. No. 120512 - 400 g

Art. Nr. 120529 - 2.500 g

Calcina Meat Bone Meal

- Pure meat bone meal with 13,6 % calcium and 13,9 % phosphor
- Natural calcium supply with high taste acceptance
- Positively affects digestion

Feeding recommendations per animal and day:

Instruction in teaspoon	Up to 10 kg	Up to 10 kg	20 kg and above
Dry feed	1	1½	3
Wet feed	1½	3	4
self-made feed	3	4	6

Starting with the 30th day of pregnancy the dosage should be doubled

For lactating mother dogs:

4 puppies = dosage x 2,

4-6 puppies = dosage x 4,

> 6 puppies = dosage x 5

Available sizes:

Art. No. 120604 - 250 g / Art.No. 120611 - 800 g

Art. No. 120628 - 3.000 g / Art.No. 120635 - 5.000 g

V25 Vitamin Tablets

- To compensate for feed-related nutritional deficits
- With 12 vital vitamins
- Supports blood formation, protein and lipid metabolisms and keep the nerve system healthy
- Especially good for pregnant and lactating dogs, during growth and under all stress conditions
- Vitamin D is needed to make calcium accessible

Ingredients:

Yeast, dextrose

Additives per kg:

Vitamin A 440.000 IU; vitamin D₃ 10.000 IU.; vitamin C 1.100 mg; vitamin E 440 mg; vitamin B₁ 44 mg; vitamin B₂ 110 mg; vitamin B₆ 44 mg; nicotine acid amid 660 mg; calcium D-pantothenate 220 mg, vitamin K₃ 44 mg; biotin 20.000 mcg

Feeding recommendations per animal and day:			
	Up to 10 kg	Up to 10 kg	20 kg and above
Instruction in tablets	½	1	1½-2

Available sizes:

Art. Nr. 110100 - 100 g (approx. 30 tabl.)

Art. Nr. 110117 - 200 g (approx. 60 tabl.)

Art. Nr. 110124 - 700 g (approx. 210 tabl.)

Canivita

- Multivitamin tonic
- Effective within 10 minutes, even with infections and after-effects of diseases of the stomach-bowel system, also during the recovery process
- Resorption via the mucous membranes and lymphatics without going through the liver, therefore little loss
- Especially under extreme stress, e.g. pregnancy, lactation, dressage, work, races, exhibition, hunting and travelling

Composition:

Plant oils and fats, emulgator, vitamin pre-mix

Additives per 1.000 ml:

vitamin A 500.000 IU; vitamin D₃ 10.000 IU; vitamin C 10.000 mg; vitamin E 1.000 mg; vitamin B₁ 600 mg; vitamin B₂ 1.000 mg; vitamin B₆ 250 mg; vitamin B12 1.000 mcg; vitamin K₃ 100 mg; nicotine acid 4.000 mg; folic acid 10 mg; pantothen acid 1.000 mg

Available sizes:

Art. No. 110001 - 100 ml

Art. No. 110018 - 250 ml

Art. No. 110025 - 1.000 ml

PETVITAL® Vitamin-Tabs

- Excellent taste acceptance
- To compensate for nutritional deficits
- Especially for spoiled animals

Composition:

Yeast, monocalcium phosphate, cacao, cellulose, calcium carbonate

Additives per kg:

Vitamin A 660.000 IU; vitamin D₃ 10.000 IU; vitamin E (as alpha-tocophero-lacetate) 2.640 mg;

vitamin B₁ 258 mg; vitamin B₂ 172 mg; vitamin B₆ 128 mg; vitamin B₁₂ 2.052 mcg; vitamin K₃ 66 mg; nicotinic acid 1.320 mg; calcium D-panto-thenate 330 mg; biotin 11.675 mcg; ascorbic acid 2.200 mg

Feeding recommendation per dog and day:

per 10 kg body weight 1 tablet a day

Available sizes:

Art.No. 712205 - 100 g (approx. 50 tablets)

Art.No. 712212 - 1.000 g (approx. 500 tablets)

PETVITAL® Energy Gel

- Energy concentrate for quick compensation of nutritional deficits as a consequence of disease, parasite infestation, after surgery, after weight loss due to negligence as well as in case of increased requirement, e.g. during pregnancy lactation, in the growth phase and in competition
- Stimulates the appetite and helps them to put on weight

Additives per kg:

Vitamin E 1.000 mg, vitamin B₁ 200 mg, vitamin B₂ 150 mg, vitamin B₆ 100 mg, vitamin B₁₂ 1,000 mcg, ca-pantothenate 500 mg, nicotinic acidamide 1.000 mg

Feeding recommendations per dogs and day:

per 10 kg body weight 1 level teaspoon

In case of increased demand or if the dog does not eat:

per 10 kg body weight 3 level teaspoons

Available size:

Art.No. 712106 - 100 ml

Tasty Treat

The healthy treat

Tasty yeast for dogs with 12 natural vitamins, 24 trace elements, 19 amino acids and essential fatty acids.

Available Sizes:

Art. No. 131051 - 200 g (approx. 400 tabl.)

Art. No. 131075 - 700 g (approx. 1.400 tabl.)

Dog Immune Protect

Especially for puppies, mother dogs, old and ill dogs and performance dogs!

Mother dog

- To strengthen the immune system and enhancement of the vitality
- For the production of high-quality colostrum in sufficient quantities

Puppies

- To strengthen the immune system and enhancement of the vitality –especially at insufficient intake of colostrum or missing colostrum due to illnesses of the mother dog or due to a big litter (feeding can start from the 2nd day of life)
- As support for the body's defences in situations of stress, e.g. during the ab lactation or a new home, at diet-related indigestion like diarrhoea

Fully grown and performance dogs

- As enhancement of the well-being and vitality
- To strengthen the immune system and to shorten the period of convalescence, for weak dogs e.g. caused by stress with following indigestion like diarrhoea, high age, illnesses or surgery
- For the enhancement of the performance of the dog, as preparation for competitions/ exhibitions/ work and for a quick recovery after those

Ingredients:

36,0% whole egg powder, 34,0% yeast, 30,0% wheat starch

Additives:

3 x 10⁹ CFU/kg *Enterococcus faecium* NCIMB 10415 EG-No. 10

Feeding recommendation per dog and day:

Puppies from 2nd day of life:

1 pinch (ca. 1g)

Recommendation: Mixed with Canina's Puppy Milk

Puppies and young dogs from 14th day of life until 9th month:

1 teaspoon (ca. 4 g)

Fully grown dogs, mother dogs, old/ill dogs, performance dogs:

Up to 10 kg body weight: 1 teaspoon, up to 25 kg body weight 2 teaspoons, above 25 kg body weight 3 teaspoons

Available Sizes:

Art. No. 142354 - 150 g

Art. No. 142361 - 300 g

Art. No. 142392 - 1.000 g

for strong
body's defences

helps with alimentary
diarrhoea

PETVITAL® Bio-Activator

- Improves feed conversion
- Strengthens the immune system
- Activates the cell metabolism
- Increases oxygen intake
- Supports muscle growth and helps to prevent sore muscles caused by lack of electrolytes
- Optimises blood supply
- Stabilises heart and blood circulation
- Accelerates regeneration after hard physical stress
- Provides vitality and efficiency

Additives per kg: Iron 900 mg, zinc 500 mg, formic acid

Feeding recommendation:

Over a period of 4 weeks 20 drops a day into the feed, followed by a 2-week break

Available sizes: Art. No. 712007 - 20 ml

Heart-Vital with L-Carnitine and Whitethorn

- To stabilise and support the function of the heart
- Improves the efficiency of the heart in conditions of chronic heart weakness
- Improves circulation on the heart muscle and harmonises the rhythm of the heart
- Improves the tolerance of the heart muscle to a lack of oxygen
- Improves the quality of life and the performance ability from birth to old age

Composition: Dextrose, vitamin-special yeast, plant extracts

Additives per litre: L-carnitine 30.000 mg

Feeding recommendation per animal and day:

Small dogs: 3 ml or 1 teaspoon mixed with the feed
Medium dogs: 6 ml or 2 teaspoons mixed with the feed
Large dogs: 9 ml or 3 teaspoons mixed with the feed

Available sizes: Art. No. 112036 - 100 ml / Art. No. 112050 - 250 ml

PETVITAL® Darm Gel (Bowel Gel)

- Regulates and stabilises the intestinal flora in a biological way
- Excellent against diarrhoea and bowel problems, e.g. caused by changes in feeding, feed incompatibility, stress, after treatment with antibiotics etc.

Additives per ml: 1 x 1012 CFU lactic acid bacteria enterococcus faecium

Feeding recommendations:

1 level teaspoon once a day for 10 days before the main meal, mixed with only a little food or applied directly into the mouth.

Available size: Art. No. 712304 - 30 ml

Moor Water HK

- For irritation of the stomach-bowel-system such as diarrhoea, changing stool consistency or flatulence
- After antibiotic therapy, the humic and fulvic-acids remove harmful substances from the bowel system and dehydrates fluid faeces so they become solid again
- Stimulates the appetite and blood formation
- Improves fertility in female and male animals
- To drain away health-damaging substances after poisoning
- Helps to fight hair loss, allergies and itching
- Cleans and purges from inside
- Synergetics effects will be reached when using it together with PETVITAL® Darm-Gel (bowel gel), but with separate and delayed administration

Feeding recommendation per dog and day:					
Dogs weight	Up to 5 kg	Up to 10 kg	Up to 20 kg	Up to 35 kg	35 kg and above
Instruction in teaspoon	½	1	2	3	4

Available size:

Art. No. 112609 - 200 ml

PETVITAL® Rice Diet

- Tasty, granulated, ready-to-use and easily digestible diet for dogs
- Rich in vitamins and trace elements
- Especially after stomach and bowel diseases
- Also excellent as elimination diet with food allergies
- Without colouring or artificial aroma agents

Additives per kg:

vitamin A 15.000 IU, vitamin D3 1.200 IU, vitamin E 50 mg, vitamin B₁ 5 mg, vitamin B₂ 5 mg, nicotine acid 30 mg, vitamin B₄ 4 mg, vitamin K₃ 2 mg, Ca-pantothene 15 mg, vitamin C 70 mg, choline chloride 1.200 mg, zinc 80 mg, iron 100 mg, manganese 20 mg, copper 15 mg, cobalt 2 mg, iodine 2 mg, folic acid 2 mg, selenium 0,30 mg, biotin 350 mcg, vitamin B₁₂ 40 mcg

Feeding recommendations per dog and day:

After stomach-bowel diseases, administer PETVITAL® Rice Diet daily over a period of 2-3 weeks. 250 g per 10 kg body weight.

Available size:

1 packing unit = 4 x 2 kg

Slim & Vital

- Dietary feed for reduction of weight for dogs
- Reduction of weight of around 1 kg in 14 day (e.g. medium-sized dogs)
- Supports of the satiety feeling
- Reduction of the hungry feeling
- Reduces the utilization of fat and calories
- Eases flatulence and irritations in stomach and in the bowel
- Enhancement of musculature by conversion of carbohydrates into muscle protein
- Growth of germs and fungus (e.g. yeast fungus) in the bowel is inhibited

Composition:

chitin, seaweed meal, ginger, chilli, mustard-seed

Content of additives per kg:

L-Carintine-Tartrate 160 g, chicory 100 g, dextrin 30 g, vitamin C 22 g

Energy content:

Convertible energy = 10,8MJ/kg

Feeding recommendations per animal and day:

Dogs weight	Up to 10 kg	10 to 25 kg	Up to 40 kg	40 kg and above
Instruction in teaspoon	1	2	3	4-5

The powder should be given with the usual feed to reach a reduction of weight. Moistened dry feed with a little lukewarm water and mix with Canina's Slim & Vital. After the first 21 days a temporary stagnation of weight is possible. Slim & Vital should be given until the aimed weight is reached.

Available sizes:

Art. No. 129058 - 250 g

Art. No. 129102 - 500 g

Puppy Milk

Can be administered from the 1st day of life

- A substitute for mother's milk for pups from their 1st day of life
- No vomiting due to nearly complete lactose withdrawal, no diarrhoea
- Excellent compatibility
- No clotting
- With 15% dextrose
- To feed motherless pups, as supplement feed in case of insufficient mother's milk, to prepare for lactation (milk production of the mother), as feed supplement and to relieve the lactating dog, as feed supplement for work dogs, breed dogs, old and ill dogs

Additives per kg:

Vitamin A 15.000 IU, vitamin D₃ 1.500 IU, vitamin E 150 mg, vitamin B₁ 5 mg, vitamin B₂ 10 mg, nicotine acid 20 mg, vitamin K₃ 1 mg, ca-pantothenate 20 mg, vitamin C 50 mg, choline chloride 1.250 mg, zinc 150 mg, iron 160 mg, manganese 15 mg, copper 15 mg, cobalt 2 mg, iodine 2 mg, folic acid 1 mg, selenium 0,3 mg, biotin 500 mcg, vitamin B₁₂ 50 mcg

Feeding recommendations for motherless puppy (instruction in teaspoon per meal)				
Postnatal week	food/day	small breeds	medium breeds	large breeds
1	every 2hours 10 times out of which 3 times at night	½	1½	2
2	every 2 h 10 times	1	2-3	3-4
3	every 2-3 h 8 times	1½	4	7
4	every 2-3 h 8 timesl	3	6	10
5-8	5 times	3	6	10

The amount of puppy milk should be adjusted according to the demand of the puppies.

Beginning with the 3rd/4th week of life Canina's Mushy Puppy Feed should be administered additionally, but the Puppy Milk should be administered until the 6th week.

Starting with the 6th week of life the Puppy lime should be administered.

For full grown dogs the puppy milk can me mixed with the feed.

Perparation:

mix the milk with an egg beater at a temperature of appr. 35°C

1 part puppy milk and 4 parts water

Available sizes:

Art. No. 130702 - 150 g

Art. No. 130719 - 450 g

Art. No. 130726 - 2.000 g

Art. No. 130733 - 4.000 g

Mushy Puppy Feed

- Supplement feed starting from the 3rd week of life to support healthy growing
- Optimal combination of nutrients and bulky materials
- High percentage of vitamins, minerals and trace elements

Composition:

Cereals, meat and animal by-products, oils, fats, fish and fish by-products, minerals

Ingredients:

crude protein 27,0 %, crude fibre 2,3% crude fat 10,00 %, calcium 1,0, crude ash 5,0 %, phosphor 0,8%

Additives per kg:

Vitamin A 15.000 IU, vitamin D3 1.000 IU, vitamin E 50 mg, vitamin B₁ 2 mg, vitamin B₂ 3 mg, vitamin B₆ 1 mg, nicotine acid 30 mg, vitamin K₃ 2 mg, capantothenate 15 mg, vitamin C 50 mg, choline chloride 200 mg, zinc 60 mg, iron 20 mg, manganese 20 mg, copper 5 mg, cobalt 1 mg, iodine 0,7 mg, folic acid 0,2 mg, selenium 0,3 mg, biotin 350 mcg, vitamin B₁₂ 40 mcg

Available sizes:

Art.No. 130603 - 600 g / Art.No. 130610 - 2.500 g / Art.No. 130627 - 5.000 g

Puppy Lime Powder & Tablets

- Mineral feed for pups. Optimally adjusted to the growing organism.
- For good teeth and strong bones.
- Calcium phosphor relation: 3: 1
- Supplement feed recommended from the 6th week of life over the entire growth period

Composition:

Powder: Calcium carbonate, mono-calcium phosphate, sodium chloride, calcium citrate, yeast

Tablets: Calcium carbonate, mono-calcium phosphate, calcium citrate, yeast

Ingredients:

Calcium 24 %, phosphor 8.0 %, sodium 3.5 %

Additives per kg:

Zinc 750 mg, copper 140 mg, iodine 12 mg, manganese 375 mg, cobalt 4 mg, selenium 4 mg

Feeding recommendations per dog per day:

Tablets	Powder (instruction in teaspoon)

Art. No. 120765 - 1.000 g (approx. 1.000 Tabl.)

PETVITAL Verminex

- Protection against ticks, fleas, lice and mites
- Easy and economic usage by applying directly onto the skin
- Vermin cannot become resistant
- Can be used on dogs, cats, rodents, birds etc.
- Does not enter into the body of the animal
- Does not harm the animal / causes no disorders of the metabolism
- Can be used very well in combination with PETVITAL Verminex Shampoo

Composition:

Octane acid, decane acid (saturated fatty acids from the coconut oil)

Application 1 X week

Dog/cat: 1 drop about every 3 cm from the tail to the root over the skull directly onto the skin, only press the bottle slightly to apply the drops.

For larger animals apply 2-3 additional drops under the axilla.

Rodents: depending on the size apply max 10 drops distributed over the skin. Only press the bottle slightly.

Birds: depending on the size apply a few drops onto the skin.

In rare individual cases there can be allergic reactions.

Available sizes:

Art. No. 741632 - 25 ml

Art. No. 741618 - 50 ml

PETVITAL Verminex Shampoo

- Natural vermin protection for all pets against fleas, lice, ticks, mites, larvae and egg-masses
- It has a repellent effect already after the first usage
- Ph-neutral – therefore gently to the skin
- Removes unpleasant smell and nourishes the coat

Composition:

Water, natural oils, vegetable oils and fatty acids (decane acid 29 g/l)

Recommendation of use:

Moisten the animal with lukewarm water and distribute the shampoo onto the coat and massage in slightly. Leave it for 5 minutes and then wash the shampoo out and dry the animal

Available size:

Art. No. 741656 - 250 ml

Petvital® Insect Protect

- Biological remedy for pets
- As protection against insect and tick bites
- As abatement after insect and tick bites

Dosage:

2-5 globules per administration in the feed or dissolved in the drinking water

After insect bites depending on the course: 2-3 times daily until the symptoms disappear

As protection: 1 – 2 times daily during the season

Available sizes:

Art. No. 714650 – 10 g (ca. 1.200 globules)

PETVITAL® Bio-Protective-Collar

- Is effective on the basis of pure natural oils
- 35 cm for cats and small dogs (with safety fastener for cats)
- 65 cm for large dogs
- Totally innocuous also for young animals
- Protects repeated infestation for about 3 months
- Re-usable and environmentally-friendly

Active ingredient:

coconut oil and its derivatives

Material:

Dark brown leather

Application recommendation:

Put the collar loosely around the neck. Cut off, if too long and, if necessary, leave this part at the sleeping place of the animal or another infested place.

It will take some hours before it takes full effect.

Available sizes:

Art. No. 741427 - 35 cm f. cats and small dogs

Art. No. 741434 - 65 cm f. large dogs

Bio-Protective-Collar

- sufficient for 5-7 additional treatments

Available size:

Art. No. 741441 - 30 ml

PETVITAL® Bio-Insect-Shocker

- Vermin environment spray
- Innocuous even with direct application onto the animal
- The respiratory system and the sucking beak of the insects are obstructed, so they can neither breathe nor eat. At the same time the insect is dried out by dehydration and dies.
- Also kills the larvae and eggs

Ingredients:

Coconut oil, coconut oil ester, rapeseed oil, jojoba oil

Application recommendation:

Apply the spray on the infested areas from a distance of about 30 cm approximately every 4 weeks, especially the places where the pet sleeps and stays. Also very effective in the area of horses.

Available sizes:

Art. No. 741304 -100 ml / Art.No. 741311 -250 ml

Art. No. 741328 -500 ml / Art.No. 741335 -1.000 ml (replenish bottle)

PETVITAL® Bio-Insect-Shocker for Birds, Rodents and Reptiles

- Vermin control for direct application on the infested animal
- Quick and reliable killing, mainly of mites and feather mites on birds.
- On rodents and hedgehogs, mainly lice, fleas, ticks, mites and their larvae and eggs
- On reptiles, mainly mites, ticks and other vermin

Ingredients:

Coconut oil, coconut oil ester, rapeseed oil, jojoba oil

Effect:

The active ingredient destroys the chitin plates of the vermin which is then reliably killed. Larvae and eggs are also destroyed.

Application recommendation:

Spray onto the animal, but not on its eyes. Sufficiently spray the environment (cage, terrarium etc.). Depending on the vermin infestation, repeat spraying every 2-4 weeks.

Please note:

As for reptiles, do not use PETVITAL® Bio-Insect Shocker prior to the first sloughing, and never during or immediately after any sloughing. Do not use on reptiles or spiders that live exclusively in water.

The product is totally innocuous for the hair and skin of rodents and hedgehogs. The same applies to the skin and feathers of birds.

Available size:

Art. No. 441303 - 150 ml (birds) / Art.No. 541300 - 150 ml (rodents)

Art. No. 741403 - 150 ml (reptiles)

Home Clean – For the home

- Effective against fleas, flea-larvae and other vermin
- Long-term protection of around 6 months
- Sufficient for around 150 m³
- Fleas and flea-larvae are killed
- The development cycle of fleas is disturbed

Recommendation of use:

HOME CLEAN should be placed centrally in the room on a heightened place where the animal lives. The content of HOME CLEAN deflates within a few minutes. The room should not be entered for around 2 hours. Afterwards it should be aired for around half an hour. Prearrangements in the rooms which should be treated with HOME CLEAN: Exterior door and windows should be closed. Before use birdcages should be removed, aquarium and terrariums should be covered and the ventilation should be turned off and food should be removed.

Abvailable size:

Art. No. 140169 - 150 ml

PETVITAL® Anti-Vermin Environment Spray

- With strong immediate and lasting effect due to micro-capsuling of the active ingredients
- Safe killing of fleas, ticks, lice, harvest mites, biting louse and other vermin
- Maggots and eggs are killed as well

Ingredients per 100 g:

Permethrin (cis-trans 25:75) 0,4 g

Pyrethrum extract 0,4 g

(natural active ingredient made of chrysanthemes)

Piperonyl butoxide 0,6 g

Application recommendation:

Shake well before use. Apply spray in the environment and onto the sleeping places

of the animal, i.e. on carpets, blankets, chairs and baskets from a distance of about 30 cm.

Important: Do not forget edges and cracks. Leave it to take effect for about 10 minutes, then open the windows to air the rooms.

Available size:

Art. No. 741205 - 500 ml

CAPHA® DesClean Spray (ready-to-use) and CAPHA® DesClean Concentrate

- A ph-neutral cleaning and disinfecting agent for kennels, cages, transport boxes, vehicles etc.;
- with bactericide, fungicide, tuberculocide, sporocide and virucide effects
- Guarantees for safe killing of parasites and also their larvae and eggs
- Even solves skin fat and urine acid
- The concentrate can also be used to wash blankets etc. (washing machine 30-40°)
- The same product is used in hospitals and clinics with a different label

Ingredients:

4-chlorine-3-methyl-1-oxybenzene, glutardialdehyde, sodium alkyl diglycol ether sulphate, propanol-2, adjuvants

Available sizes:

Spray	Art. No. 140107 - 500 ml (ready-to-use)
Concentrate	Art. No. 140114 - 500 ml
	Art. No. 140121 - 1.000 ml

Garlic Powder & Tablets

- Does away with ticks and other vermin
- Has an antibacterial effect, especially in the stomach-bowel system and protects from worm infestation
- Prevention against age symptoms and improves performance
- Has blood-cleansing and detoxication effects
- Contains the essential amino acid lysine (3,0 %) and methionine (0,5 %)

Ingredients:

Garlic, yeast, fish-meal, seaweed

Feeding recommendation per animal and day:

1 tablet or 1 teaspoon per 10 kg body weight

Available sizes:

Tablets:	Art. No. 130306 - 180 g (approx. 45 tablets)
	Art. No. 130313 - 560 g (approx. 140 tablets)
Powder:	Art. No. 130207 - 225 g
	Art. No. 130214 - 700 g
	Art. No. 130221 - 2.500 g

PETVITAL® Eye Tissues

- One-way moist tissues for the care and cleaning of eyes
- Soaked with an eye-friendly solution

Available size:
Art. No. 741038
120 tissues

PETVITAL® Ear Tissues

- One-way moist tissues for the care and cleaning of ears
- Soaked with an eye-friendly solution

Available size:
Art. No. 741120
120 tissues

Ear Balm

- Quick and safe cleaning and care of the outer ear
- Especially for long-haired breeds of dog
- Deodorise in a pleasant way
- Easy handling
- For best results combine with PETVITAL® Ear Tissues

Ingredients:

Isopropyl alcohol (2-Propanol), arnica tincture, glycerine

Application recommendation:

Apply a few drops of ear balm into the outer ear, after about 1 minute massage the ear in a down to up direction. The dog will shake out the ear balm together with the solved ear wax and dirt.

When used regularly (about twice a week) dirt in the ears will effectively be prevented.

Available size:

Art. No. 140305 - 100 ml

Eye Care Lotion

- For external use
- For eye cleaning and care
- Prevents irritation by dirt, dust and foreign bodies

Ingredients:

Demineralised water,
miscellaneous sodium hydrogen phosphates

Application recommendation:

Use the solution for external application on the eye. Use a new cotton-wool swab for every eye.

Available size:

Art. No. 140008 - 100 ml

Dental Can

- Eliminates bad breath in dogs and, when used regularly, prevents parodontosis, gum inflammation and dental tartar
- Removes stuck feed remains

Ingredients:

Chamomile extract, peppermint oil, benzalkonium chlorite, thymol, tinct. rhei aquosa.

Application recommendation:

Push the bottleneck into the flew pocket and then squeeze out some DENTAL CAN by pressing the bottle for a short time. Do not spray into the throat. Then massage the side of the mouth for a short while. Then repeat the same on the other side. Using a small sponge or a toothbrush can also be very effective.

Available size:

Art. No. 140183 - 100 ml / Art.No. 140206 - 250 ml

Dog-Stop Forte Dragees

- Protects the bitch from harassment by dogs during the heat season
- Eliminates unpleasant smell of mouth and coat, even on male dogs
- Chlorophyll based of (chlorophyll is an element of the green in leaves)
- Can be combined excellently with DOG-STOP spray

Feeding recommendation per animal and day:

Up to 5 kg	1 x daily 1 dragee
5 to 20 kg	2-3 x daily 1 dragee
20 kg and above	4-6 x daily 1 dragee

Use from the first sign of heat during heat season.

1-2 dragees daily against unpleasant breath and coat smell

Available size:

Art. No. 142309 - 60 coated tablets

Dog-Stop Spray

- Protects the bitch from harassment by dogs during the heat season
- For external application
- Takes effect immediately, e.g. when going out, at exhibitions, in the presence of male dogs
- Can be combined excellently with DOG-STOP coated tablets

Application

recommendation:

From the first signs of heat, DOG-STOP spray is applied daily morning and night and also as required.

Available size:

Art. No. 142316 - 100 ml

Canilind

- Hydro-active emulsion on basis of Aloe Barbadensis
- Skin soothing effect
- Anti-bacterial
- Reduces itchiness
- Supports the regeneration and new formation of skin cells after a damage of the skin
- Can be given directly on open wounds
- Acts as an air-permeable wound closure
- Protects against germs
- To be used after insect- and tick bites, wounds, cracks, burns, abrasions, and itchiness

Composition:

Aloe Barbadensis gel 10,0%, neutral salve basis, glycerine, water.
Free of preservatives and aromatic substances.

Recommendation of application:

Apply the emulsion two to three times per day onto the affected parts of the skin and massage in slightly if possible. The application should be continued for a few days until the disorders are totally eliminated.

Available Size:

Art. No. 140404 - 50 ml

NEW

Capha® Animal Care Balm

- With camomile and sage extract
- To treat chaffing of the skin, insect bites, the paws, mucous membranes and the gums
- Also to be applied after tick bites, animal bites and scratches and for cleaning the outer ears
- In winter, excellent for paw care, especially if salt has been used on the streets
- As a healing care product, Capha® Animal Care Balm helps the skin to heal after injuries, relieves irritation and inflammation symptoms and supports wound healing
- Excellent for horse care, especially for sensitive parts of the tail and hooves, also for cleaning the nostrils
- Very economical usage

Ingredients:

3 % camomile blossom extract, 15 % sage leaves in paraffin

Application recommendation:

If not otherwise recommended by the vet: 1-3 times a day

For the skin: apply several drops to the respective area and massage it in. Prior to application, shave coat area, if necessary. For birds, remove sandy or dusty grit. The product should not get into contact with the feathers, using a cotton-bud is best.

For the mucous membranes (e.g. gums): for small pets, cats and small dogs 1-2 drops, for bigger dogs 3-6 drops applied to a cotton-bud, fibre-free tissue or your fingertip and then massage.

Available sizes:

Art. No. 140329 - 25 ml / Art. No. 140336 - 100 ml

BEAUTY CARE LINE

Oat Milk Shampoo 250 ml for cats and dogs

- for frequent hair washing of dogs of all ages, for all types of hair
- for pups
- for cats
- can also be used on allergy-prone animals with sensitive skin

Oat Milk Shampoo is smooth to the skin and hair and preserves the natural acid protection of the skin. The hydrolysed oat proteins protect and soothe stressed skin. The oat milk has a slightly anti-inflammatory effect and soothes skin irritation. This every day shampoo can also be applied to cracking, dry skin without any risk.

It has a pleasant aroma which is not overpowering.

Available Size:

Art. No. 741915 250 ml

Art. No. 741984 5 Ltr.

Mink Oil Shampoo 250 ml for dogs

This shampoo is especially good for dogs with long, silky hair. It has a skin refattening effect and prevents static load of the hair. After washing, the hair can be combed easily.

The lipopeptides and fatty acids penetrate the hair structure and build up the individual hairs from the inside, without making it heavy. The hair becomes soft and gets a silky shine.

Available Size:

Art. No. 741908

Silky Shine Spray 200 ml for cats and dogs

This spray is applied to the dry or wet hair of the animal. The contained basic oil (paraffin oil) allows easy combing of the hair and tangles can be resolved more easily. The individual hair is covered with a protective film which prevents immediate attraction of dust. The hair becomes soft, light, and shiny. The colours of the coat show better. Especially good as „Finishing“ at shows.

Available Size:

Art. No. 742004

Anti-parasite-Spray 200 ml for dogs

This plant based spray– without chemical ingredients – has a repellent effect against vermin: It should be applied every time prior to walking the dog and it will protect the dog against ticks, fleas, lice, biting lice and harvest mites. It is not uncomfortable for the dog as it has a very pleasant smell. The combination of natural oils (geranium, tea tree oil, camphor, citronella) creates a protective layer around the dog preventing the above named parasites to infest it. It can be used on pups from their 8th week of life. It is also harmless to children and pregnant women.

Available Size:

Art. No. 741809

PETVITAL® Biotin Tabs

- Very high taste acceptance
- Especially for spoiled animals

Composition:

Dextrose, rice semoline, cacao, flavouring

Additives per kg:

Biotin 1.000,000 mcg; vitamin B2 350 mg;
nicotine acid 1.750 mg; cholinchloride 8,06 g

Feeding recommendations:

1 tablet with 2 mg biotin

Available sizes

Art. No. 702008 - 100 g = approx. 50 tablets

Art. No 702015 - 1.000 g = approx. 500 tablets

content of biotin
per kg
1.000 mg

Cat-Coat O.K. Powder & Tablets

- For skin and hair problems caused by insufficient biotin supply
- For shiny coat, healthy skin and claws and optimal pigmentation
- Tasty milk yeast as carrier substance, therefore high acceptance even by spoiled cats
- For all breeds, colours and ages

Ingredients:

yeast, vitamin pre-mix

Additives per kg:

100.000 mcg biotin

Feeding recommendation per cat and day:

Tablets: 4-6 tablets

Powder: 1-2 teaspoons

If problems have already occurred, the dose should be doubled for 6 weeks.

Available sizes:

Tablets: Art. No. 201525 - 50 g (approx. 100 Tabl.)

Art. No. 201532 - 125 g (approx. 250 Tabl.)

Powder: Art. No. 201426 - 50 g

Art. No. 201433 - 100 g

content of biotin
per kg
100 mg

Cat-Coat-Top-Gel

- Biotin-zinc product with 333,000 mcg biotin and 500 mg zinc per kg
- High taste acceptability even by spoiled cats
- Biotin insufficiency in cats shows as follows: dried amounts of secretion around mouth, nose and eyes, hair loss, first on the extremities, then slowly over the entire body. Hair loss in the face results in the phenomenon of the so-called „spectacle -eyes“. Pigment loss and dandruff appear.

Ingredients:

Dextrose, raw sugar

Additives per 1.000 ml:

333.000 mcg biotin, zinc 400 mg, conserved in potassium sorbate and citric acid

Feeding recommendation per cat and day:

1 teaspoon a day for a period of 6 weeks. Subsequently, half that dose will be sufficient.

Available size: Art. No. 230907 - 100 ml

PETVITAL® Derm-Caps & Derm Liquid

- For metabolic, hormone and allergy-related skin and hair problems
- With evening primrose oil as a particularly active essential fatty acid
- In the following conditions, an insufficiency of fatty acids may occur: During growth and lactation, in old age under stress (e.g. in the heat season or pregnancy), diabetes, cortisone treatment, after surgery etc.
- An insufficiency is also shown by brittle and dry hair, eczema (especially between the toes), dandruff, skin allergy, increased proneness to skin irritation with infections, inflammation of the auditory meatus, increased ear wax formation, delayed wound healing, growth anomalies.

Composition:

Evening primrose oil, sea animal oil

Additives per 1.000 ml Derm-Caps:

Zinc 1.025 mg / 0,3 mg per capsule; vitamin A 957.101 IU/ 280 IU per capsule; pantothen acid 6.836 mg / 2.0 mg per capsule; biotin 34.182 mcg / 10,0 mcg per capsule

Additives per 1.000 ml Derm Liquid:

Vitamin E (as alpha-tocopherol acetate) 141.288 mg, dexpanthenol 463 mg, biotin 139 mcg

Feeding recommendation per dog and day:

Derm-Caps: over a period of about 2 weeks, 1 capsule a day per 10 kg body weight. After this cure an administration of 1 capsule per 10 kg body weight 3 times a week is sufficient.

Derm Liquid: 8 drops a day per 10 kg body weight spread over the feed.

Feed at least for 4 weeks in case of deficit symptoms.

Available size:

Derm-Caps: Art. No. 702107 40g (ca. 100 capsules)

Derm Liquid: Art. No. 702206 - 25 ml / Art. No. 702213 - 250 ml

Cat-Mineral Powder & Tablets

- Feed lime with minerals, trace elements, calcium and phosphor (for skeleton, teeth, muscles), yeast (for metabolism, appetite, digestion) and seaweed meal (for pigmentation)
- Favourable calcium-phosphor relation of 2 : 1

Ingredients:

Yeast, calcium carbonate, calcium-sodium-magnesium phosphate, seaweed meal, monocalcium phosphate, sodium chloride

Additives per kg:

Vitamin A 320.000 IU, vitamin D₃ 7.000 IU, vitamin E 180 mg, copper 80 mg

Feeding recommendation per cat and day:

Tablets: Depending on the size 4-6 tablets

Powder: Depending on the size 1-2 teaspoons

The dose can be doubled for pregnant cats and at wet feeding.

Available sizes:

- Tablets: Art. No. 220922 - 75 g (approx. 150 tablets)
Art. No. 220939 - 150 g (approx. 300 tablets)
- Powder: Art. No. 220816 - 75 g
Art. No. 220823 - 150 g

CAT-Vitamin Tabs

- Prevent insufficiency symptoms and help to eliminate nutrient deficits
- Strengthens the resistance and performance, especially after diseases and during the heat season and the lactation period (lactating queens)
- Tasty yeast as carrier substance, therefore especially high taste acceptance
- Particularly recommended when diet is mainly tinned food

Ingredients:

Milk yeast, vitamin pre-mix

Additives per kg:

Vitamin A 600.000 IU, vitamin D₃ 10.000 IU, vitamin E (as alpha-tocopherol acetate) 2.430 mg, vitamin B₁ 240 mg, vitamin B₂ 160 mg, vitamin B₆ 120 mg; vitamin B₁₂ 1.800 mcg, nicotine acid 1.200 mg, vitamin C 2.000 mg, biotin 10.000 mcg

Feeding recommendation per animal per day:

Depending on the size of the cat 5-6 tablets

Available sizes:

Art. No. 210312 - 50g (approx. 100 Tabs)

Art. No. 210329 - 125g (approx. 250 Tabs)

PETVITAL® Vitamin-Tabs

- Excellent taste acceptance
- To compensate for nutritional deficits
- Especially for spoiled animals

Composition:

Yeast, monocalcium phosphate, cacao, cellulose, calcium carbonate

Additives per kg:

Vitamin A 660.000 IU; vitamin D₃ 10.000 IU; vitamin E (as alpha-tocopherol acetate) 2.640 mg; vitamin B₁ 258 mg; vitamin B₂ 172 mg; vitamin B₆ 128 mg; vitamin B₁₂ 2.052 mcg; vitamin K₃ 66 mg; nicotine acid 1.320 mg; calcium D-pantothenate 330 mg; biotin 11.675 mcg; ascorbic acid 2.200 mg

Feeding recommendation:

1 tablet a day

Available sizes:

Art. No. 712205 - 100 g (approx. 50 tablets)

Art. No. 712212 - 1.000 g (approx. 500 tablets)

for the spoiled cat

PETVITAL® Vitamin Gel with Taurine

- To balance up for nutritional deficits in case of absolutely insufficient vitamin supply, decreased utilisation and uptake, e.g. due to illness
- Taurine insufficiency can make the cat blind

Additives per kg:

Taurine 10.000 mg, vitamin E 4.000 mg, vitamin D₃ 25.000 IU, vitamin B₁ as thiamine hydrochloride 100 mg, vitamin B₂ as riboflavin 80 mg, vitamin B₆ as pyridoxol hydrochloride 50 mg, vitamin B₁₂ 1.000 µg, choline chloride 13.500 mg, nicotinic acidamide 450 mg, calcium pantothenate 150 mg, biotin 4.000 µg

Feeding recommendations per cat per day:

1 teaspoon preferably spread over the feed. Young cats get half that dose.

Available size:

Art.No. 712502 - 100 ml

PETVITAL® Energy Gel

- Energy concentrate for quick compensation of nutritional deficits as a consequence of disease, parasite infestation, after surgery, after weight loss due to negligence as well as in case of increased requirement, e.g. during pregnancy lactation, in the growth phase and in competition
- Stimulates the appetite and helps them to put on weight

Additives per kg:

Vitamin E 1.000 mg, vitamin B₁ 200 mg, vitamin B₂ 150 mg, vitamin B₆ 100 mg, vitamin B₁₂ 1,000 mcg, ca-pantothenate 500 mg, nicotinic acidamide 1.000 mg

Feeding recommendation per cat and day:

Max. ½ teaspoon

In case of increased demand pr of the cat does not eat:

Max. 1 ½ teaspoons

Available size:

Art. No. 712106 - 100 ml

Cani-Bonbon

- Healthy treat tablet
- Tasty milk yeast with many natural vitamins, trace elements and amino acids

Ingredients:

Milk yeast

Feeding recommendation per cat per day:

Depending on the size of the cat 6-10 bonbons

Available sizes:

Art. No. 202300 - 50 g (ca. 100 Tabletten)

Art. No. 202317 - 125 g (ca. 250 Tabletten)

Moor Water HK

- For irritation of the stomach-bowel-system such as diarrhoea, changing stool consistency or flatulence
- After antibiotic therapy, the humic and fulvic-acids remove harmful substances from the bowel system and dehydrates fluid faeces so they become solid again
- Stimulates the appetite and blood formation
- Improves fertility in female and male animals
- To drain away health-damaging substances after poisoning
- Helps to fight hair loss, allergies and itching
- Cleans and purges from inside
- Synergetics effects will be reached when using it together with PETVITAL® Darm-Gel (bowel gel), but with separate and delayed administration

Feeding recommendation per cat and day:

½ teaspoon

Available size:

Art. No. 112609 - 200 ml

PETVITAL® Catlax-Gel

- Effectively supports natural digestion of hairballs. Swallowing hair is a natural process due to the typical cleaning behaviour of cats. Due to hair ball formation, normal digestion is sometimes disturbed.
- Due to the high percentage of a special plant lubricant, the effectiveness of the product is unique. It is not taken up by the digestive systems of the cat. Given with the feed, CATLAX GEL forms an emulsion with the mushy feed and the lubricant develops slime-like substances, preventing swallowed hairs and hair balls from obstructing the digestive system and can be excreted without any problems. It also improves the ability of the excrements to bind water which facilitates defecation.
- Very high taste acceptance.

Ingredients:

Oil, fats, plant by-products

Additives per kg:

Vitamin E 1.000 mg

Feeding recommendation:

1 teaspoon (about 5 ml) 3 times a week to be spread over the feed. Young cats get half that dose.

Available sizes:

Art. No. 712403 - 100 ml

PETVITAL® Bio-Activator

- Improves feed conversion
- Strengthens the immune system
- Activates the cell metabolism
- Increases oxygen intake
- Supports muscle growth and helps to prevent sore muscles caused by lack of electrolytes
- Optimises blood supply
- Stabilises heart and blood circulation
- Accelerates regeneration after hard physical stress
- Provides vitality and efficiency

Additives per kg: Iron 900 mg, zinc 500 mg, formic acid

Feeding recommendation:

Over a period of 4 weeks 20 drops a day into the feed, followed by a 2-week break

Available sizes: Art. No. 712007 - 20 ml

Cat Milk

- Can be administered from the first day of life
- Mother's milk substitute with 15 % dextrose for kittens
- No vomiting due to nearly complete lactose withdrawal, no diarrhoea
- Excellent compatibility
- No clotting
- To feed motherless kittens, as supplement feed in case of insufficient mother's milk, to prepare for lactation (milk production of the queen), as feed supplement and to relieve the lactating queen, as feed supplement for pedigree cats, old and ill cats

Additives per kg:

Vitamin A 15.000 IU, vitamin D₃ 1.500 IU, vitamin E 150 mg, vitamin B₁ 5 mg, vitamin B₂ 10 mg, Nicotine acid 20 mg, vitamin K₃ 1 mg, calcium pantothenate 20 mg, vitamin C 50 mg, choline chloride 1,250 mg, zinc 150 mg, iron 160 mg, manganese 15 mg, copper 15 mg, cobalt 2 mg, iodine 2 mg, folic acid 1 mg, selenium 0,3 mg, biotin 500 mcg, vitamin B₁₂ 50 mcg

Feeding recommendations for motherless puppy (instruction in teaspoon per meal)

Year of living	meals per day	cat milk per feeding
1.-3. Day	every 2 hours 10 times out of which 3 times at night	1
4.-7. Day	every 2 hours 10 times out of which 3 times at night	1-2
8.-9. Day	every 2 hours 10 times	2
10. Day	every 2 hours 10 times	2-3
11.-14. Day	every 2-3 hours 8 times	4-5
15.-21. Day	every 2-3 hours 8 times	5

Available sizes:

Art. No. 230808 - 150 g / Art. No. 230815 - 450 g / Art. No. 230822 - 2.000 g

Biological remedies for birds

PETVITAL® SC 05

Iodine deficiency, disturbances of the thyroid - Art.No. 412808

PETVITAL® SC 10

Excessive laying performance, irritations of mucous membranes of the crop - Art.No. 412990

PETVITAL® SC 20

Moulting, bald parts without feathers, dull feathers, feather-pecking, running disease, metabolic disturbances - Art.No. 413003

PETVITAL® SC 30

Cold, rhinitis, purulent conjunctivitis, sole ulcers, general suppuration, angina, abscess, throat infections - Art.-Nr. 413010

PETVITAL® SC 40

Improved wound healing, blood loss due to injuries, egg-bound, sore feet, bruises, exhaustion, all sorts of injuries, wound treatment - Art.No. 413027

PETVITAL® SC 50

Febrile diseases, pneumonia, respiratory distress - Art.No. 413034

PETVITAL® SC 70

Diarrhoea treatment, circulatory weakness - Art.No. 413041

PETVITAL® SC 90

Verminosis prophylaxis - Art.No. 413065

PETVITAL® PROPOLIS SC 2000

Mineral catalyst to improve the immune system, with infections and inflammatory diseases. Contains all vital trace elements

For all PETVITAL® SC- Produkte:

Content: 15 ml

Dosage:

Apply with the feed or the drinking water. Generally, 3-5 drops in about 100 ml of drinking water per animal, depending on its size.

Depending on the reason of application, the products can be given for one or two days or sometimes up to several weeks. There is no accustoming habituation effect.

A healthy bird drinking PETVITAL® SC Drops will not be affected in a negative way, the product will just show no effect on it. Therefore it is not necessary to separate ill birds from the healthy birds. There are no known contraindications, side effects and interactions with other products.

PETVITAL® Bird Power

- With 20 different amino acids (incl. lysine and methionine) as well as iron and zinc
- This unique combination of active ingredients has the following effects on ornamental birds, budgies and parrots: receptiveness to fertilisation and better fertilisation of the eggs, low death rate of chicken and young birds, improved feather quality, reduced feather-picking, growth regulation, good feed conversion and weight increase, helps during moulting, helps during wound healing, immune stimulation, helps with respiratory diseases, also during antibiotic treatment, protection from skin diseases and vermin infestation, shorter recovery times, support in stress conditions such as exhibitions and travels, improves the appetite

Additives per 1.000 ml:

Iron 900 mg, zinc 500 mg, formic acid

Feeding recommendation per bird and per day in 100 ml of drinking water:

Small birds, e.g. canaries and budgies: 3-5 drops

Bigger birds depending on their size: 5-10 drops in the feed or drinking water. Follow that recommendation for a period of 4 weeks. After that stop for 4 weeks and then proceed for another 4 weeks.

Available size:

Art. No. 431305 - 15 ml

PETVITAL® Multivitamin Spray

- With all vital vitamins
- For parrots, budgies, canaries and other ornamental birds
- By spraying it onto the food, the bird must take in the vitamins with its feed. So there is no loss.
- Vitamin insufficiency prophylaxis and in conditions of particular stress, e.g. transportation, exhibitions, climatic changes, feed changes, parasite infestation and other physical stress

Additives per 1.000 ml:

Vitamin A 7.000.000 IU., vitamin C 15.000 mg, vitamin D₃ 18.000 IU, vitamin E (as alpha-tocopherol acetate) 5.000 mg, vitamin K₃ 1.400 mg, vitamin B₁ 600 mg, vitamin B₂ 1.500 mg, vitamin B₆ 800 mg, vitamin B₁₂ 1.800 mcg, nicotine acid 4.000 mg, pantothen acid 3.000 mg, folic acid 80 mg, biotin 2.000 mcg

Feeding recommendation per bird and day:

Budgies and canaries: spray twice on the feed

Cockatiels and parakeets: spray three times on the feed

Amazons, grey parrots and cockatoos: spray four times on the feed

Macaws: spray five times on the feed

Available sizes:

Art. No. 713301 - 50 ml

Art. No. 713318 - 100 ml

AFG

- Has an appetizing effect
- Helps optimal feed conversion
- Helps to put on weight

Ingredients:

Crude protein 0,06 %, crude fat 0,00 %, crude fibre 0,00 %, crude ash 0,07 %, lysine 0,55 %, methionine 1,55 %

Additives per 100 ml:

Iron 900 mg, zinc 500 mg, formic acid

Feeding recommendation per bird and day:

Ornamental birds and songbirds 5 drops, big parakeets and parrots 10 drops spread over the feed or into the drinking water

Available size: Art. No. 431342 - 15 ml

Curative Moor Water V

Simple feed out of natural moor

- To treat and prevent stomach-bowel problems e.g. caused by a change in food, cold, stress, change of place or owner
- After antibiotic therapy and to restore a health bowel flora
- To strengthen the body's natural defences
- In case of illnesses as an accompanying treatment in addition to the orthodox medical treatment by the vet
- To improve growth
- To increase fertility in female and male animals

Feeding recommendation per bird per day:

Ornamental birds. Depending on their size: 1-3 drops

Racing pigeons: 5 drops

Can be mixed with the drinking water or the basic feed.

After opening, it should be used within 2 months.

Trade size: Art. No. 412617 - 30 ml

1st place in
contest Animal
Protection
Innovation
(DeZooFa 2007)

Bird V12

- Provides optimal condition and supports the instinct to speak and sing
- Recommended in all stress situations such as moulting, transport, exhibitions, travels etc.
- Resorption via the mucous membranes and lymphatics without going through the liver, therefore little loss

Comosition:

Plant oils and fats, emulsifying agent, vitamin pre-mix

Additives per 1,000 ml:

vitamin A 500.000 IU, vitamin D₃ 10.000 IU,

vitamin E (as Alpha-tocopherol acetate) 1.000 mg, vitamin C 10.000 mg,

vitamin K₃ 100 mg, vitamin B₁ 600 mg, vitamin B₂ 1.000 mg, vitamin B₆ 250

mg, vitamin B₁₂ 1.000 mcg, nicotine acid 4.000 mg, pantothen acid 1.000 mg,

folic acid 10 mg

Feeding recommendation per bird and day:

Ornamental birds and songbirds 5 drops, big parakeets and parrots 10 drops spread over the feed or into the drinking water

Available size: Art. No. 410514 - 25 ml

Moulting Stop

- For optimal support during moulting
- Improves the plumage quality
- Helps to reduce feather-plucking

Composition:

Crude protein 0,06 %, crude fat 0,00 %, crude fibre 0,00 %, crude ash 0,07 %, lysine 0,55 %, methionine 1,55 %

Additives per 100 ml:

Iron 900 mg, zinc 500 mg, formic acid

Feeding recommendation per bird and day:

During moulting: ornamental birds and songbirds 5 drops, big parakeets and parrots
10 drops spread over the feed or into the drinking water

Available size:

Art. No. 431335 - 15 ml

Feather Shine

- Linseed and spinach rolled in icing sugar, sprayed with biotin and dried
- Provides strong and healthy plumage of high colour intensity
- Supports during moulting
- With 300,000 mcg biotin per kg

Composition:

Linseed, spinach, icing sugar

Additives per kg:

300.000 mcg biotin

Feeding recommendation per bird and day:

Depending on the size of the animal ½ - 1 measuring spoon. In problematic cases and during moulting double the amount should be given.

Available size:

Art. NO. 401062 - 50 g

Iodine pellets

P for big parakeets and parrots

V for ornamental birds and songbirds

- Protect against thyroid problems due to iodine insufficiency
- With 500 mg iodine per kg
- Very palatable

Composition: Seaweed meal, yeast

Additives per kg: 500 mg iodine

Feeding recommendation per bird and day:

recommended feeding with orphan breeding

Jod-pellet P: 2 tablespoons (= approx. 4 g)

Jod-pellet V: 1 tablespoons (= approx. 2 g)

Available size:

Jodine-pellet P: Art. No. 431502 - 125 g

Jodine-pellet V: Art. No. 431519 - 40 g

Honey Bonbons

P for Big Parakeets and Parrots

V for Ornamental Birds and Songbirds

- Healthy treats for a change and as a reward
- With pure bee honey, tried and test as a healing and strengthening product

Comosition: Seeds, bee honey, vegetables

Feeding recommendation per bird and day:

to be mixes accordingly with 100g bird seed

Honey-Bonbons P: Approx. 35 Honey-Bonbons

Honey-Bonbons V: Approx. 15 Honey-Bonbons

Available size:

Honey-Bonbon P: Art. No. 402335 - 160 g

Honey-Bonbon V: Art. No. 402328 - 55 g

Honey Bonbons P and V are also available for retail dealers in bulk to be mixed with their own special feed. Even very small quantities of 3-5 % will markedly improve the visual impression and the taste of the feed and make it different from other seed mixes.

Vit + Min

P for Big Parakeets and Parrots

V for Ornamental Birds and Songbirds

- Calcinated bone meal containing 27 % calcium, 13.5 % phosphor, 14 vital vitamins and trace elements
- Improves vitality, helps to strengthen the bones, creates thick and shiny plumage, supports digestion and compensates for feed-related insufficiency
- Saves feed by better feed conversion

Comosition:

Calcinated bone meal, vitamin-mineral-trace elements premix

Additives per kg:

Vitamin A 154.000 IU, vitamin D₃ 15.400 IU, vitamin C 1.747 mg, vitamin E 84 mg, Vitamin B₁ 277 mg, vitamin B₂ 56 mg, vitamin B6 7 mg, vitamin B₁₂ 108 mcg, folic acid 1,5 mg, calcium-pantothenate 83 mg, niacin 193 mg, choline chloride 4.010 mg, sodium chloride 4.900 mg, iodine 15 mg, iron 385 mg, cobalt 3.8 mg, copper 39 mg, magnesium 299 mg, manganese 53 mg, zinc 525 mg, iodine 4 mg, selenium 6 mg, cobalt 1,5 mg

Feeding recommendation per bird and day:

Vit + Min P: ½ teaspoon spread over the feed

Vit + Min V: A pinch spread over the feed

Available size:

Vit + Min P: Art. No. 420216 - 160 g

Vit + Min V: Art. No. 420209 - 40 g

BIOLOGICAL REMEDIES for RODENTS

PETVITAL® N 200

Hair loss, dull hair, eczema, metabolic problems
Art.No. 513208

PETVITAL® N 300

Purulent inflammations, rhinitis, local suppuration, abscesses, angina, conjunctivitis, coughs, swallowing problems, sole ulcers, toe suppuration
Art.No. 513215

PETVITAL® N 400

All sorts of injuries, wound healing, bruises, blood loss due to injuries, exhaustion, stress
Art.No. 513222

PETVITAL® N 500

Febrile diseases, pneumonia, respiratory distress
Art.No. 513239

PETVITAL® N 700

Diarrhoea treatment
Art.No. 513246

PETVITAL® N 900

Bladder infection, blood in urine
Art.No. 513291

PETVITAL® PROPOLIS N 2000

Mineral catalyst to improve the immune system, with infections and inflammatory diseases. Contains all vital trace elements
Art.No. 513307

For all PETVITAL® N-Products:

Content: 15 ml

Dosage:

Apply with the feed or the drinking water. Generally, 3-5 drops in about 100 ml of drinking water per animal, depending on its size. Depending on the reason for application, the products can be given for one or two days or sometimes up to several weeks. There is no accustoming habituation effect.

A healthy animal drinking PETVITAL® N Drops will not be affected in a negative way, the product will just show no effect on it. Therefore it is not necessary to separate ill rodents from healthy ones. There are no known contraindications, side effects and interactions with other products.

PETVITAL® Multivitamin Spray

- With all vital vitamins
- For rabbits, guinea-pigs, mice, rats and other rodents
- As the product is sprayed onto the feed, the rodent has to take in the vitamins to get to his feed. Therefore nothing of the product is lost.
- For vitamin insufficiency prophylaxis and in times of severe stress, e.g. transportation, exhibitions, climatic changes, feed changes, parasite infestation and other physical stress
- Very good taste acceptance

Additives per 1.000 ml:

Vitamin A 7.000.000 IU, vitamin C 15.000 mg, vitamin D₃ 18.000 IU, vitamin E (as alpha tocopherol acetate) 5.000 mg, vitamin K₃ 1.400 mg, vitamin B₁ 600 mg, vitamin B₂ 1.500 mg, vitamin B₆ 800 mg, vitamin B₁₂ 1.800 mcg, nicotine acid 4.000 mg, pantothen acid 3.000 mg, folic acid 80 mg, biotin 25.000 mcg

Feeding recommendation per rodent and day:

Rabbits and guinea-pigs: spray four times over the feed

Hamster and other small rodents: spray three times over the feed

Available sizes:

Art. No. 713509 - 50 ml

Art. No. 713516 - 100 ml

Curative Moor Water N

Single feed out of natural moor

- to treat and prevent stomach-bowel problems e.g. caused by a change in food, cold, stress, change of place or owner
- after antibiotic therapy and to restore a health bowel flora
- to strengthen the body's natural defences
- in case of illnesses as an accompanying treatment in addition to the orthodox medical treatment by the vet
- to improve growth
- to increase fertility in female and male animals

Composition:

Natural moor water and moor water extract

Feeding recommendation per rodent and day:

Rodents depending on their size: 3 - 6 drops

Can be mixed with the drinking water or the basic feed.

After opening, it should be used within 2 months.

Trade size:

Art. No. 512621 - 30 ml

*We have got something
against the summer-eczema*

NEW

EQUOLYT® Bio-Eczema-Protection

Equolyt Bio-Eczema-Protection de-hydrates the body of the insects. The active component also destroys the chitinous exoskeleton and the fibrins (proteins) of larvae and egg masses. Equolyt Bio-Eczema-Protection works fast and is effective against all kind of insects. Due to its combination of active compounds the product has an outstanding immediate and long-term effect.

Recommendation of Application:

Bio-Eczema-Protection should preventively be applied with a sponge on concerned parts. Most of the times these are crest of equine neck and root tail. (please protect the eyes). Depending on the requirements it should be applied 2-3 times a week; also a daily application is possible.

Composition:

100 g contain 15g/l octane acid, 15 g / l decane acid (parts of the coconut-oil)

Available Size:

Art. No. 341344 -1.000 ml

EQUOLYT® Bio-Eczema-Lind

Areas of Application:

Summer eczema, syndromes of mallerder, insect- and tick-bites, wounds, cracks, burns, abrasion of all kinds, itchiness caused by superficial, allergic disorders of the skin, saddle sores.

Bio-Eczema-Lind can be given directly onto open wounds and acts as a natural, air-permeable wound closure, which protects against germs but which is breathable.

In combination with Bio-Eczema-Lind it is an optimal protection against mosquitoes and other insects.

Recommendation of application:

The emulsion should be applied 2-3 times a day onto the concerned areas of the skin – if possible massage in slightly. The application should be repeated for a few days until all symptoms disappeared.

Composition:

Aloe Barbadosis gel 10,0%, neutral salve basis, glycerine, water. Free of preservatives and aromatic substances

Available Size:

Art. No. 340255 - 50 ml

EQUOLYT® Biotin Horse Powder & Tablets

- A lack of biotin manifests itself as follows: the hooves become crumbly, have loose walls, are dry, show gaps and tears and grooves, they are soft, thin and rubber-like with coronets showing lacerations, flaking along with other damages. This makes the horse lame as the hooves are sore.
- Also to be used against itchiness, hair loss, dull hair, dandruff, pigment problems and eczema

Composition:

rice semolina, sugar

Additives per kg:

vitamin A 600.000 IU, vitamin D3 18.000 IU, biotin 4.500 mg (powder 1.500 mg), vitamin E (as alpha-tocopherol acetate) 4.500 mg, vitamin C₅ 000 mg, vitamin B1 300 mg, vitamin B₂ 450 mg, vitamin B₆ 900 mcg, nicotinic acid 900 mg, calciumD-pantothenate 450 mg, folic acid 150 mg

content of biotin per kg
 Pulver: 1.500 mg
 Tabletten: 4.500 mg

Feeding recommendation per horse and day:			
	small horses	medium Horses	big & heavy horses
Instruction in tablets	½	1	2
Instruction in tablespoons	1	1 ½	2

Add biotin to the feed for a period of 5 months; subsequently half the amount is often sufficient in order to guarantee an adequate biotin supply.

Available sizes:

Tablets: Art. No. 301607 - 200 g (approx. 60 tablets) / Art. No. 301614 - 700 g (approx. 210 tablets)
 Powder: Art. No. 301737 - 500 g / Art. No. 301744 - 1.500 g / Art. No. 301751 - 3.000 g

EQUOLYT® Yeast

This beer- and mineral yeast is rich in enzymes, proteins, ferments, vitamins of the B-group and trace elements. Beer-yeast improves the appetite, provides a good digestions, strengthens the nerves and has a positive effect on the coat and the physical condition. This yeast is an important supplement feed which your horse likes to eat.

Feeding recommendation per horse and day:

Depending on the size: 10-12 tablespoons spread over the feed. (1tablespoon = ca. 15 g)

Composition:

Beer-yeast, mineral-yeast

Available sizes:

Art. No. 330102 - 3.000 g

EQUOLYT® Seaweed Meal

Natural health – made out of fresh seaweed (ascophyllum)

Seaweed meal, made out of fresh seaweed (ascophyllum) is a high-class natural product. Due to its high content of minerals, amino-acids and trace-elements this high-class natural product regulates unbalanced feeding. It also supports the metabolism of the skin and the pigmentation because it contains iodine, zinc and carotenoids.

The contained amino-acid lysine optimises the nutrient uptake; cellulose and mannitol support the digestion. The immune system is strengthened by the high content of vitamins (e.g. vitamin C).

Feeding recommendation per horse and day:

Depending on the size 6 – 8 tablespoons (1 tablespoon = ca. 15 g) spread over the feed.

For pregnant and lactating horses double the dose.

Available Size:

Art. No. 330454 - 750 g

Art. No. 330447 - 4.000 g

EQUOLYT® Derm-Liquid

Equolyt Derm-Liquid is a combination of natural evening primrose oil and high concentrated essential fatty acids cis-linoleic acid and gamma-linoleic acid. A deficit of these essential fatty acids, vitamins and additives causes:

- Brittle and dry hair
- Mat and dull coat
- Loss of hair
- Increased proneness to skin irritations
- Retarded wound healing
- Increased loss of fluid loss via the skin
- Composition: Evening primrose oil, sea animal oil

Additives per 1.000 ml:

vitamin E (alpha-tocopherol acetate) 141.288 mg,

dexpanthenol 463 mg, biotin 139 mcg

Feeding recommendation:

For a period of about 3 weeks 1 tablespoon a day (ca. 12 ml) over the feed. Then 1 tablespoon twice a week.

Available Sizes:

Art. No. 302215 - 250 ml

Art. No. 302239 - 1.000 ml

EQUOLYT® Garlic

Ticks and other vermin do not like garlic. Equolyt garlic with the additives of methionine and lysine is creating an unpleasant odour for vermin. Equolyt Garlic is a healthy supplement feed. Garlic is a prophylaxis against aging symptoms and it enhances the performance. Especially in the stomach-bowel system it acts anti-bacterial and therefore it is protecting against worm infestation

Feeding recommendation per horse and day:

Depending on the size 1 – 3 tablespoons
(1 tablespoon = ca. 15 g) spread over the feed

Composition:

yeast, garlic, seaweed meal, apple marc, thyme

Available sizes:

Art. No. 330249 - 1.000 g

Art. No. 330256 - 3.000 g

EQUOLYT® Calcium Carbonate

Calcium is for the supply of the horse essential. The organism needs calcium for:

- Blood clotting
- Musculature
- Strong teeth
- Growing and keeping the skeleton strong
- Formation of cartilages
- Recommended for fully grown and healthy horses; for young, older and ill horses Calcium Citrate is more suitable

Ingredients:

36 % calcium

Feeding recommendation per horse and day:

Depending on the size 4 – 6 tablespoons spread over the feed
(1 tablespoon = ca. 15 g)

Available sizes:

Art. No. 320004 - 1.000 g

Art. No. 320011 - 3.500 g

EQUOLYT® Horse Mineral

- The optimal supplement feed for compensating feed-related nutritional deficits
- Feed lime with macro- and micro-minerals for skeleton, musculature and teeth, which are fully accessible already after a few hours
- Seaweed and mineral yeast support the appetite, activate the metabolism and the digestion and support the pigmentation
- High taste-acceptance
- Optimal calcium-phosphorus-relation of 2:1

An increased demand of minerals and trace-elements exists:

- At young horses in the period of growth
- At older horses
- At pregnant and lactating horses
- At skin and coat problems, change of coat, problems with hooves
- At problems which are caused by allergies, dandruff and mat coat
- At stressed horses, which are nervous and un-focused during training
- At problems with bones and cartilages

Composition:

monocalcium phosphate, calcium carbonate, yeast, seaweed meal, aroma (banana)

Ingredients:

calcium: 15,3 %, phosphorus 14,9 %, sodium 0,39 %

Feeding recommendation per horse and day:

Depending on the size 4-6 tablespoons spread over the feed.

Available sizes: Art. No. 320424 - 4.000 g / Art. No. 320417 - 10.000 g

EQUOLYT® Mag Horse

A high-concentrated magnesium and vitamin B₁₂ product for anxious, nervous and in their performance limited horses.

Equolyt® Mag Horse is a supplement feed out of highly dosed magnesium and vitamin B₁₂ for stabilisation of the nervous system of nervous and anxious horses, which therefore intake only little feed which then results in limited performance.

EQUOLYT® Mag Horse is used at:

Nervous, anxious stresses horses, unsteady willingness to perform, horses in the period of growth, older horses, lactating mares

Composition:

lactose, magnesium carbonate, magnesium citrate, magnesium gluconate

Ingredients:

Crude fat: 0,5 %, magnesium: 12,7 %, crude fibre: 1,0 %

Additives per kg:

vitamin B₁₂ 250.000 mcg

Feeding recommendation per horse and day:

4 tablespoons spread over the feed. After 14 days the dosage can be halved for another 3 months. (1 tablespoon = ca 15 g)

Available sizes: Art. No. 310401 - 1.000 g / Art. No. 310418 - 3.000 g

EQUOLYT® Arthro Forte

The plants, minerals and vitamins contained in Equolyt Arthro Forte support the metabolism of the bones. The mobility of your horse is supported; ligaments and sinews are positively influenced.

Areas of Application:

- After bone fractures and after surgeries
- Weak joints
- Bruises, dislocations, sprains
- Rheumatic pains
- Articular gout

Composition:

Rice semolina, maltodextrin, willow bark, comfrey root, apple marc, thyme, di-calcium phosphate, calcium-sodium-phosphate, dextrose, sodium chloride, magnesium oxide

Ingredients:

crude protein 7,1 %, crude ash 6,8 %, phosphor 0,4 %, crude fat 1,1 %, calcium 1,0 %, magnesium 0,4 %, crude fibre 10,4 %

Additives per kg:

vitamin E (as alpha-tocopherol acetate) 4.550 mg, manganese 20 mg, zinc 6 mg, vitamin B₁ 1.560 mg, cobalt 5 mg, vitamin B₁₂ 260.000 mcg, molybdenum 3 mg, iron 390 mg, copper 3 mg

Feeding recommendation per horse and day:

Young horses: from their 6th week of life - twice a day 1 tablespoon for 30 days. After an interval of 6 months this treatment should be repeated.

Fully-grown horses: Over a period of 6 months, 2 tablespoons twice a day. Subsequently 2 tablespoons should be given twice a day for 30 days once a year.

After surgery, fractures or growth disorders: 3 tablespoons twice a day over a period of 2-6 months. (1 tablespoon = ca. 15 g)

Available sizes: Art. No. 323050 - 500 g / Art. No. 323067 - 1.000 g / Art. No. 323074 - 3.000 g

EQUOLYT® Calcium Citrate

Calcium is essential for the supply of the horse. The organism needs calcium for:

- Blood clotting
- Musculature
- Strong teeth
- Growing and keeping the skeleton strong
- Formation of cartilages

Deficits in the period of growth can result in decalcification of the bones. Due to its excellent compatibility we recommend Canina Calcium Citrate for young horse, older and ill animals as also fully grown horses need a permanent supply of calcium, which is depending on the metabolism.

Ingredients: 21 % Calcium

Feeding recommendation per horse and day:

depending on the size 4 – 6 tablespoons spread over the feed (1 tablespoon = ca. 15 g)

Available sizes: Art. No. 320516 - 400 g / Art. No. 320547 - 2.500 g

EQUOLYT® Horse & Horse 100%

To stabilise the connective tissue

- BREEDING: during pregnancy
 FOALS: to build up the connective-tissue
 PERFORMANCE: to promote performance and staying power
 AGE: to increase quality of life of older horses

Horse is 100%
of pure
shell essence

EQUOLYT® HORSE is to supply the motion apparatus with high-quality glycosaminoglycans (GAG), which are contained in the green lipped mussel. Due to its high content of glycosaminoglycans, connective tissue structures like chords, ligaments, joint cartilage and intervertebral discs are positively influenced. EQUOLYT® HORSE is a complex of natural agents which are indispensable for function, performance and staying power of the motion apparatus:

- amino acids and seaweed flour: quickly available sulphur supplier
- freeze-dry green lip mussel: to supply the connective tissue and the joint cartilage with glycosaminoglycans,
- Vitamin E and selenium: cell protection factors serving mainly to break down destroying metabolism products.

Zusammensetzung:

Horse: Kräuter, Trockenobst, 20 % stabilisierter, kultivierter, handverlesener, spezialgetrockneter Muschleextrakt (*Perna canaliculus*), Reisspeisegrieß, Seetalgalmehl
 Horse 100%: 100% reiner Muschleextrakt (*Perna canaliculus*)

Composition:

Horse: herbs, dried fruit, 20% of stabilised, cultivated, hand picked and special dried mussel extract (*Perna canaliculus*), rice semolina, seaweed flour
 Horse 100 %: 100 % pure mussel extract (*Perna canaliculus*)

Feeding recommendation per horse and days:

- Horse: horses: 3 times one tablespoon = 30 g (distributed over the day)
 Foals and ponies: 3 time ½ tablespoon = 15 g (distributed over the day)
 Spread over the feed (1 tablespoon = ca. 10 g)
 Horse 100 %: depending on the size 1 – 2 teaspoons spread over the day (1 teaspoon = ca. 3 g)

Additives per kg:

Only at Equolyt Horse: Vitamin E (as alpha-tocopherol acetate) 10.000 mg, selenium 12 mg

Available sizes:

- Horse: Art. No. 321032 - 500 g
 Art. No. 321001 - 1.000 g
 Art. No. 321049 - 3.000 g
 Horse 100%: Art. No. 301942 - 400 g
 Art. No. 301980 - 2.000 g

EQUOLYT® Horse Vit

Equolyt® HORSE VIT with 12 vitamins is a syrup for horses composed according to scientific aspects, stabilized and opened up according to a specific patented procedure. It is effective in a very short time, as the vitamins are resorbed via the mucous membranes and the lymph nodes. The vitamins are indispensable for extreme stress conditions, e.g. during pregnancy, nursing period, dressage, work, races, voyages, stress, growth and development.

Composition:

demineralised water, soy bean oil, sodium chloride, sodium bicarbonate

Additives per 1.000 ml:

vitamin A 500.000 IU, vitamin D₃ 10.000 IU, vitamin C 10.000 mg, vitamin E 1.000 mg, vitamin E 1.000 mg, vitamin B₁ 600 mg, vitamin B₂ 1.000 mg, vitamin B₆ 250 mg, vitamin B₁₂ 1.000 mcg, vitamin K₃ 100 mg, nicotine acid 4.000 mg, folic acid 10 mg, pantothenic acid 1.000 mg

Feeding recommendation per horse and day:

1-3 tablespoons spread over the feed (1 tablespoon = ca. 12 ml)

Available sizes:

Art. No. 310012 - 250 ml

Art. No. 310029 - 1.000 ml

EQUOLYT® Vita Horse

Important for performance, physical condition, and appetite!

Equolyt® Vita Horse is a combination of vitamins and amino-acids which is quickly resorbable. For a good performance of a horse it needs to generate high amounts of energy in the muscles. For the synthesis of the enzymes involved it needs vitamins of the B-complex. Methionine contributes to the regeneration of cells and betaine reduces lactate deposits in the muscles. The musculature does not over-acidify and the concentration of the horse stays longer.

Additives per kg:

vitamin B₁ 8.500 mg, vitamin B₂ 2.850 mg, vitamin B₆ 430 mg, vitamin B₁₂ 2.850 mg, folic acid 715 mg, methionine 140 mg, betaine 1.000 mg

Feeding recommendation per horse and day:

3 tablespoons spread over the feed. Performance horses should get the doubled dosage. (1 tablespoon = ca. 10 g)

Available sizes:

Art. No. 310043 - 1.000 g

Art. No. 310050 - 3.000 g

Leingold® – Linseed

- Pure gold-yellow premium linseed - ready to use
- From controlled cultivation, comprehensive lab tests and recommended by vets
- Regulating digestion and helps to avoid colic
- Generally better feed utilisation
- Better performance due to a regenerated and strengthened organism
- Rich in unsaturated fatty acids that make the coat look more beautiful and shining

Application „gut“:

No need to kibble or cook – you can administer the linseed pure. So Leingold can constantly act in the gut. The Leingold specific mucilages are acting soothing to the gut as they develop a fine colloidal protective film on the sensitive mucosa membranes.

Always take care of sufficient clean water.

Application „stomach“:

LEINGOLD® prepared as gruel helps quickly and gently against digestion and stomach problems. Pour boiling water on LEINGOLD® and allow cooling and swelling for about 30 minutes and then feed it while lukewarm.

Feeding recommendation per horse and day:

Foals	50 – 80 g
Young and small horses	70 – 100 g
Performance horses	100 – 150 g
Breeding mares and stallions	150 – 200 g

Composition:

Pure linseed

Available sizes:

Art. No. 331208 - 5 kg

Art. No. 331253 - 25 kg

Vitamins and their Physiological Significance

Vitamin A

Vitamin A plays an important role in the creation and regeneration of skin and mucous membranes. It contributes to strengthen the resistance of the body against infectious diseases. Therefore, Vitamin A is of vital importance to health, growth and fertility.

Vitamin D₃

Vitamin D₃ regulates calcium and phosphorus resorption in the bowels, it also regulates the calcium and phosphorus deposits in the skeleton and improves the calcium and phosphorus exchange rate in the skeleton.

Vitamin E

Vitamin E is extremely important to control the carbon hydrate metabolism, especially the muscle metabolism and the glycogen supply. In this context, Vitamin E also contributes to regulating the hormone metabolism. Insufficient supply of Vitamin E results in the degeneration of muscles of the heart and skeleton, also in movement disorders and other, sometimes species-specific animal diseases.

Vitamin C

Vitamin C is essential for the formation and maintenance of soft tissue, bones, cartilage and teeth. Sufficient Vitamin C supply increases the resistance to infections.

Vitamin B₁

This vitamin is essential for the transfer of nerve impulses, i.e. no impulse exchange between muscle and nerve is possible without B₁. Only with sufficient Vitamin B₁ supply will growth depressions, disturbances of the nerve system, lack of appetite and insufficient use of energy be prevented.

Vitamin B₂

Vitamin B₂ plays an important role in the carbon hydrate, fat and protein metabolisms. Optimal Vitamin B₂ supply prevents retarded growth, insufficient feed exploitation and diseases of the digestive system.

Vitamin B₆

Vitamin B₆ is a central factor in protein metabolism. A lack of Vitamin B₆ results in retarded growth, skin inflammation and problems during hatching and to the newly born animals during birth.

Vitamin B₁₂

Vitamin B₁₂ is essential for blood formation, growth and numerous other metabolic processes. It is also directly involved in the formation of various amino acids and this is why animal protein can be substituted or reduced in favour of vegetable protein by Vitamin B₁₂.

Vitamin K

Vitamin K is responsible for the regulation and maintenance of normal prothrombin formation. Insufficient Vitamin K supply results in problems with blood coagulation, so even small wounds or irritations, e.g. of the mucous membranes of the bowels, can result in heavier bleedings as the time for blood clotting will be longer.

Nicotinic acid

If the animal does not get enough nicotinic acid, there may be skin changes, diseases of the stomach-bowel system, retarded growth and inflammation of the mucous membranes.

Pantothen acid

This vitamin is of particular importance for the formation and reduction of fats. Pantothenic acid is also needed for normal function of the skin and the mucous membranes. Optimal pantothenic acid supply prevents diseases of the skin and the mucous membranes, problems of digestion and the breathing system, growth and reproduction disturbances as well as decreased adaptation to stress situations.

Folic acid

Folic acid is participated in protein metabolism and especially in building the cell cores. It also plays an important role in the production of red blood cells and blood colour, besides Vitamin C and Vitamin B₂.

Canina®

History

Since the establishment in the year 1984 Canina® has concentrated on the development and production of high-quality supplement feed and care and hygiene products for pets and horses. Today Canina® employs approximately 40 employees at its facilities in Hamm/Germany. A nation-wide acting field service ensures an intensive support of pet shops, veterinarians, pharmacies, alternative practitioners for animals, dog care salons and breeders.

Quality assurance

The quality of our products is guaranteed by constant measuring controls. Going beyond compulsory and official controls, we are constantly carrying out quality checks ourselves and the ecological behaviour of all our employees is likewise important. We constantly support and plan suitable measures for improvement the environmental situation for the advantage of humans, animal and nature.

Activities

Our activities are not only limited to Germany. In the meantime we supply our products to approx. 30 states world-wide; e.g. to the largest parrot breeding farm of the world near to Manila on the Philippines. We are also serving customers in Saudi Arabia and the United Arab Emirates with a particular product range for camels

Trade marks

As protected registered trade marks are registered: Canina®, PETVITAL®, EQUOLYT®, CAPHA® and Original Canidos®. Original Canidos® is exclusively reserved for veterinarians. In Italy and Spain we have additionally registered the trade mark MESOFLEX®. Already for many years a series of free-for sale, homeopathic remedies for pets are available under the label of PETVITAL®.

Awards

A confirmation of our company philosophy was the evaluation of our vermin control product PETVITAL® Bio Insect Shocker with the note „VERY GOOD“ by the renowned consumer magazine ÖKO TEST in the expenditure 5/2002. More than 60 vermin control products for dogs and cats were tested. Only 3 of it completed the test with the evaluation „VERY GOOD“- also our Bio-Insect-Shocker. In the expenditures 12/2004 and 02/2006 the test was repeated. Again we were awarded with our PETVITAL® Bio-Insect-Shocker with the best mark „VERY GOOD“. Our Curative Moor Water V won the innovative competition at the trade fair DeZooFa in the year 2007 in the segment „birds“. The city of Hamm honoured Canina® with the award „Hammer ÖKOPROFIT enterprise 2000/2001“. ÖKOPROFIT (ecological project for integrated environmental technology) is a cooperative project between a municipality and the local economy. The participating companies improved their environmental management – therefore they relieve on the one hand the environment and save on the other hand costs - ecology and economics profit of it equally.

We are conscious that not only the continuous quality of our products is of large importance but we would rather like to get permanent trust and loyalty of our customers.

Put us on test, we are looking forward to it!

Your Canina® team

Models, that convince!

As beauty comes from within!
